

Is mestkafe.com legit? TrustSniffer's high-trust assessment: 100/100

mestkafe.com

Verdict

100

OUT OF 100

HIGH TRUST

mestkafe.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Turkish-language online shop (Mest) selling vaping supplies: e-liquids, salts, N-base, pod mods, atomizers and accessories. Shows product listings with prices in TL, contact via WhatsApp and email, shipping and refund information, and social links. Appears to be a standard retail storefront built on OpenCart.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://mestkafe.com/>

What mestkafe.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

This Turkish-language ecommerce website, presented as “Mest,” sells vaping products and accessories through a conventional online storefront. Visitors are shown categories including e-liquids, nicotine salts, N-base, pod-mod products, atomizers and accessories, with prices in Turkish lira, account and checkout functions, shipping and refund information, and contact through WhatsApp and email.

Scam/Impersonation Risk

No contradictions were observed: the available evidence identifies no phishing, impersonation, malicious-content, or confirmed blacklist finding. The storefront’s product catalogue, checkout structure, shipping and refund information, social links, and standard OpenCart implementation are consistent with an ordinary retail site rather than a credential-harvesting or investment scheme. A soft reputational signal exists because a small number of abuse reports were associated with the shared hosting IP; the attribution is to shared data-centre infrastructure, not specifically to the website, and therefore does not establish deceptive conduct. The real-world operator remains likely rather than independently verified.

EVIDENCE

- The homepage presents a conventional ecommerce catalogue with product prices, cart functions, and product-category navigation.
- The contact and storefront pages provide WhatsApp and email contact channels, while the site includes shipping and refund information.
- External security checks recorded no malicious or suspicious result, no phishing or impersonation finding, and no confirmed blacklist finding.
- The hosting IP was associated with 4 abuse reports at confidence score 27; the record attributes these reports to shared infrastructure.

Regulatory Verification Notes

The site appears established and evidence-consistent with a genuine retail operation, but the available pages do not independently establish the legal entity operating it or any applicable regulatory authorization. No license or registration number is presented in the supplied storefront material; this is a disclosure gap for regulatory verification, not evidence of a scam. The domain has been registered through GoDaddy.com, LLC since 2017, and the registration record uses Registration Private through Domains By Proxy, LLC; that privacy arrangement is administrative and does not resolve the operator's identity. The site's valid domain-validated TLS certificate and stable technical presentation provide additional integrity support, although domain validation confirms encrypted transport rather than legal ownership.

EVIDENCE

- The domain was registered on 2017-02-22 and is 9.5 years old; the registrar is GoDaddy.com, LLC.
- Web archives record 161 snapshots spanning 2017–2026, with 10 years tracked.
- The site is served from AS48660, VeriUP - VERIUP Bulut Internet Hizmetleri A.S., TR.
- TLS is issued by YR2 at DV validation level and is valid to 2026-11-19T08:13:55+00:00.

What to Verify Next

Before credential or payment interactions, an independent check should confirm the merchant's legal identity, applicable Turkish retail and vaping-product requirements, and the ownership of the published contact channels. The shipping, refund, and terms information should be reviewed for a named contracting party, delivery limitations, age-related requirements, refund conditions, and a payment method offering appropriate dispute protection. Any account should use a unique password and payment details should be entered only through the site's normal checkout flow after those checks are satisfactory.

EVIDENCE

- The homepage and product pages show direct-sale functionality with Turkish-lira pricing and a checkout path.
- The contact page and storefront expose customer-support channels that can be cross-checked independently.
- The site presents shipping and refund information that should be reconciled with the contracting merchant identified in its legal terms.

Summary Verdict

The overall posture is **high trust and low risk**, with the evidence consistent with an established, apparently legitimate ecommerce website and no observed scam or impersonation contradiction. Confidence in the classification is strong enough for normal site interaction, while the operator’s real-world identity should remain treated as likely rather than proven.

Infrastructure Integrity

The website benefits from CDN/WAF protection, including an observed edge server at 216.198.79.1 on AS16509. The infrastructure resolves successfully and separates edge delivery from a potential origin, which mitigates direct exposure of the underlying service; protective infrastructure is a risk-reduction measure, not proof of merchant legitimacy.

Closing Assessment

Proceed with ordinary independent merchant-identity, returns-policy, and payment-protection checks before submitting credentials or making a purchase.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 4 reports on hosting IP 217.195.202.8 (VERIUP Bulut Internet Hizmetleri A.S., Data Center/Web Hosting/Transit), 27% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mestkafe.com.

- The request stayed on mestkafe.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by odeaweb.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-22. NOTED
- The earliest public archive of this site is from 2017-03-07. CLEAR
- It is hosted on VeriUP, from a server in TR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mestkafe.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
