Full analysis

Overview

This website is the public-facing site of the Republic of Türkiye Ministry of Foreign Affairs, presenting multilingual diplomatic information, ministerial activities, press releases, foreign-policy material, consular-service resources, and institutional contact information for a government-information purpose.

Scam/Impersonation Risk

No contradictions were observed. The homepage and associated content present a coherent Ministry of Foreign Affairs identity, with government navigation, ministerial statements, diplomatic activity reports, consular information, and no detected solicitation of funds, investment promotion, credential harvesting, or sensitive login forms. External reputation checks returned no malicious or suspicious detections, and the available evidence does not indicate phishing, brand impersonation, or a confirmed blacklist. The website appears legitimate and established, although the real-world operator identity remains independently unverified.

EVIDENCE

- The homepage identifies the Republic of Türkiye Ministry of Foreign Affairs and provides multilingual ministry, foreign-policy, press, consular, and contact sections.
- The domain was registered on 1998-10-14 and is 27.85 years old; historical records contain 562 snapshots spanning 1997–2026 across 30 tracked years.
- External checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist hit.

Regulatory Verification Notes

The site functions as an informational public-sector service rather than a financial, investment, or merchant platform. Its ministry, ministerial-activity, press, consular, and contact pages provide a coherent institutional presentation, but the available evidence does not independently verify the real-world operator. No financial licence or registration number is presented; for this business model, that is a transparency and applicability note rather than evidence of wrongdoing. The site's long registration continuity, substantial historical presence, clean reputation, and government-oriented content are consistent with an established website.

EVIDENCE

- The page title is “Republic of Türkiye Ministry of Foreign Affairs,” and the site identifies its category as Government / Official.
- The site is served from AS9121, TTNNet - Turk Telekomunikasyon Anonim Sirketi, TR.
- Transport security uses a GlobalSign RSA OV SSL CA 2018 certificate with OV validation, issued to T.C. Dışişleri Bakanlığı, valid to 2026-12-07T12:48:53+00:00.

What to Verify Next

Before credential or payment interactions connected with any consular process, independently confirm the relevant service and contact route through an official government directory or an offline government contact channel. Any payment request, account destination, or document-submission instruction should be checked against the ministry's independently confirmed procedures rather than relying solely on an embedded link or message.

EVIDENCE

- The site provides dedicated Consular Info and Contact Us navigation for institutional and public-service enquiries.
- The captured homepage contained no login form, no sensitive form, and no untrusted form destination.
- The observed business model is informational and does not solicit payments or investments.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate public-sector website. The presentation, historical continuity, technical security, and clean external reputation converge without observed scam or impersonation contradictions, while independent operator verification remains incomplete.

Infrastructure Integrity

The site resolves directly to infrastructure operated by TTNNet - Turk Telekomunikasyon Anonim Sirketi in Türkiye, with two likely origin addresses and no detected CDN or WAF layer. This provides a conventional, attributable hosting posture; the absence of an intermediary protection layer is not, by itself, evidence of malicious activity.

Closing Assessment

Routine informational access is proportionate; before submitting credentials, documents, or payments, ordinary independent confirmation of the relevant official service and payment-protection arrangements should be completed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mfa.gov.tr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
