

Is mfstechgroup.com a scam? TrustSniffer's high-risk assessment: 0/100

mfstechgroup.com

Verdict

0

OUT OF 100

CRITICAL RISK

mfstechgroup.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

A podcast site (mfstech.pt - Berlin) listing episodes across categories, host bio, sponsorship blurb, and a newsletter signup. No payment requests or investment offers are present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://mfstechgroup.com/>

What mfstechgroup.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website presents an informational podcast and media platform focused on “how-to” topics in life and business, with categorized episodes, host biographies, sponsorship content, and a newsletter signup intended to support listener engagement rather than financial transactions.

Scam/Impersonation Risk

The site has a **confirmed blacklist signal**, with malicious detections from multiple external security sources, including Fortinet and Sophos. This is materially inconsistent with the otherwise benign homepage presentation and drives the elevated sensitive-interaction risk assessment. The page review found no payment request, investment offer, login form, wallet connection, or other obvious phishing mechanic; however, the absence of those mechanisms does not neutralize the external detections. No distinct legal-entity conflict was observed, and the third-party broker dataset contained no matching record. The contact and content presentation should therefore not be treated as sufficient evidence of safety for credentials, downloads, or other sensitive activity.

EVIDENCE

- External reputation telemetry recorded 13 malicious detections, including tier-one detections associated with Fortinet and Sophos.
- The homepage presents podcast episodes, sponsorship content, and a newsletter signup, with no payment or investment solicitation identified.
- The domain was registered on 2019-05-09 and is approximately 7.29 years old; registration is through PDR Ltd. d/b/a PublicDomainRegistry.com.

Regulatory Verification Notes

The reviewed content describes a standard podcast and sponsorship model rather than a regulated financial service, and no license claim or financial-product disclosure is presented. This limits the immediate regulatory relevance of the site but does not establish the identity of the operator or validate the website's security reputation. The available evidence supports an unverified operator identity, while the external security findings require priority treatment over the site's low-risk editorial presentation. Any proposed sponsorship, commercial arrangement, or collection of personal information should be assessed separately from the site's media content.

EVIDENCE

- The homepage identifies the service as a podcast/media platform with business, startup, education, sport, travel, and art categories.
- The site contains one newsletter signup form with a consent checkbox and no sensitive form fields detected.
- Hosting telemetry identifies AS62416, operated by PTServidor - SAMPLING LINE-SERVICOS E INTERNET, LDA, PT.
- The site uses a DV TLS certificate issued by YR2, valid through 2026-11-17.

What to Verify Next

Before any sensitive interaction, an organization should independently confirm that the intended domain is the official publication channel through a separately obtained source, such as a verified organizational profile or an offline contact route. Security teams should validate the external detections against the specific domain and review any files, redirects, newsletter processing, or third-party content associated with the site. If a commercial relationship is contemplated, the contracting entity, sponsorship terms, data-processing practices, and applicable business registration should be confirmed through authoritative records before execution.

EVIDENCE

- The homepage has no login form, hidden sensitive form, wallet activity, or external POST activity in the observed behavior.
- The observed site behavior completed successfully in 2 of 2 runs, with no external XHR or fetch activity detected.
- The page lacks a meta description and structured data, reducing the amount of independently machine-verifiable site metadata available.

Summary Verdict

The website should be treated as presenting **critical trust and sensitive-interaction risk**. Its benign podcast content does not outweigh the confirmed external security detections, and the operator’s real-world identity remains unverified. Read-only observation may be considered for analytical purposes, but the site is not suitable for credentials, downloads, financial activity, or other sensitive engagement.

Infrastructure Integrity

The site resolves directly to two likely origin addresses and has no detected CDN or WAF layer; the hosting environment is provided by PTServidor under AS62416 in Portugal. This architecture offers less intermediary protection and leaves the hosting environment as a relevant technical consideration, although infrastructure characteristics alone do not establish malicious intent.

Closing Assessment

Prospective users and organizations should avoid sensitive interaction and should proceed only after independent confirmation of the domain, the operator, and the specific external detections.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine, external reputation.

- 01 Sensitive Interaction Risk
- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mfstechgroup.com.

- The request stayed on mfstechgroup.com. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by ptservidor.net, across 3 name servers. NOTED

- The registration is paid up to 2027-05-09. NOTED
- The earliest public archive of this site is from 2019-06-29. CLEAR
- It is hosted on PTServidor, from a server in PT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mfstechgroup.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
