

Is mgtv.com legit? TrustSniffer's high-trust assessment: 98/100

mgtv.com

Verdict

98

OUT OF 100

HIGH TRUST

mgtv.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-07-06 by automated analysis. Classification confidence 55%.

What this site appears to be

Chinese streaming portal (芒果TV) landing page listing shows, categories, VIP membership prompts, account and privacy policy links, and content schedules. Primarily informational and promotional for video content.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is a Chinese entertainment-streaming portal branded as 芒果TV (Mango TV), presenting television programmes, films, news, documentaries, live content, and scheduled programming through a predominantly free-access model supplemented by advertising and paid VIP membership.

Scam/Impersonation Risk

No phishing, malware, blacklist, or impersonation contradictions were observed. The homepage presents a coherent entertainment service rather than a financial or credential-harvesting operation; analysis found no sensitive forms, hidden forms, wallet activity, cloaking, clipboard manipulation, or suspicious inline scripts. Some automated observations involving external requests, dynamic content changes, and a similarity association with an unrelated messaging-service label were not corroborated by the page content and are consistent with an interactive, advertising-supported media site. The overall evidence therefore supports a low scam and impersonation risk posture.

EVIDENCE

- The homepage contains substantial, internally coherent programming, category, membership, and content-schedule material, with no fraud indicators reported.
- The homepage analysis recorded no login form, hidden form, sensitive form, wallet connection, wallet-drainer activity, or clipboard-write behavior.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and a global traffic rank of 6329.
- The domain was registered on 2000-10-31 and is approximately 25.79 years old.

Regulatory Verification Notes

The website appears to operate as a conventional media and subscription service, but the supplied page evidence does not independently verify the real-world operator. Account and privacy-policy links are present, while an applicable licensing authority or registration number is not identified in the available content; this is a disclosure gap requiring ordinary verification rather than evidence of deception. The site's transport and hosting signals are consistent with an established service, and no broker-related reputational match was identified.

EVIDENCE

- The site's homepage includes account-access and privacy-policy links.
- The site is hosted on AS23724, CHINANET-IDC-BJ-AP - IDC, China Telecommunications Corporation, CN.
- Its TLS certificate uses OV validation, was issued by GeoTrust G2 TLS CN RSA4096 SHA256 2022 CA1, and is valid through 2027-01-19.
- The available page content does not state a licensing authority or registration number for the service.

What to Verify Next

Before credential or payment interactions, independently confirm the legal operator associated with the Mango TV service and review the applicable subscription, cancellation, refund, and privacy terms. Where paid access is material, confirm any relevant content-distribution authorization through the appropriate official corporate or licensing records. Contact details and account-recovery channels should be reached through independently sourced official information rather than an unsolicited message or advertisement.

EVIDENCE

- The homepage offers VIP membership prompts and account-related functions, making subscription and credential terms the relevant verification points.
- The page includes a privacy-policy link, providing a basis for reviewing data-use and account-handling provisions.
- The available evidence does not independently connect the website to a verified real-world operator.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for ordinary interaction. The principal qualification is that the real-world operator identity is not independently verified, so legitimacy should be regarded as evidence-consistent rather than proven.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, with observed edge infrastructure on AS16509 and two potential origin candidates alongside the edge addresses. This layered architecture is a mitigating exposure-control measure, not proof of ownership or legitimacy; the resolved hosting environment is separately associated with China Telecommunications Corporation.

Closing Assessment

Normal browsing is proportionate to the assessed posture, while independent merchant-identity, service-term, and payment-protection checks should precede credential submission or paid transactions.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mgvtv.com.

- The request stayed on mgvtv.com. It was not redirected to another domain. CLEAR
- Registration is published under Alibaba Cloud Computing (Beijing) Co., Ltd.. CLEAR
- DNS for this domain is served by alidns.com, across 2 name servers. NOTED
- The registration is paid up to 2030-10-31. CLEAR
- It is hosted on CHINANET-IDC-BJ-AP, from a server in CN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mgvtv.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
