What michelleconnollylpc.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is the online presence of Michelle Connolly, LPC, P.C., a Portland, Oregon psychotherapy practice offering somatic and attachment counseling, individual therapy, DBT, addiction treatment, provider information, appointment booking, office details, and insurance billing through client session fees and PacificSource coverage.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent professional-service model, identifies a named psychotherapy practice, describes clinical services and provider background, and provides ordinary appointment and contact functions rather than investment offers, aggressive promotions, online financial transactions, or credential-harvesting forms. Technical interaction testing found no cloaking, hidden forms, password collection, wallet activity, or other abuse-oriented behavior. The available external reputation checks contained no malicious or suspicious detections, although reputation coverage was partial.

EVIDENCE

- The homepage describes somatic and attachment counseling, Sensorimotor Psychotherapy, DBT, addiction treatment, assessment, and individual therapy.
- The captured homepage had no login form, sensitive form, untrusted form destination, or wallet-related behavior.
- The domain was registered in 2010 (~16.18 years old).
- The archive record contains 184 snapshots spanning 2011–2025 (15 years tracked), with no detected suspicious repurposing or semantic drift.

Regulatory Verification Notes

The site provides service, provider, office, hours, insurance, and No Surprises Act information, but the supplied page content does not present a professional license number or registration identifier. That is a verification and disclosure gap rather than evidence of fraud. The operator identity is not independently verified, so the on-site practice identity should be treated as apparent rather than proven. Registration through ENOM, INC., stable hosting, valid transport encryption, and the absence of adverse external reputation signals provide affirmative support for an established site. The homepage's generic title, missing structured metadata, and limited search-description information reduce presentation quality but do not create an identity contradiction.

EVIDENCE

- The domain is registered through ENOM, INC.; the recorded registration date is 2010-06-17 and the expiry date is 2027-06-17.
- The site is served from AS40092, ONIAAS - HostPapa, US.
- The TLS certificate is issued by GlobalSign GCC R6 AlphaSSL CA 2025, uses DV validation, and is valid to 2026-10-11T08:04:13+00:00.
- The homepage displays provider, office, hours, insurance, and No Surprises Act information but no license or registration number in the captured content.

What to Verify Next

Before credential or payment interactions, an interested party should independently confirm Michelle Connolly's professional authorization and the practice's operating identity through the relevant Oregon professional registry. Ordinary checks should also confirm appointment terms, cancellation and billing arrangements, insurance treatment, privacy practices, and payment protections; official contact channels should be confirmed through an independent route where practical.

EVIDENCE

- The homepage includes a "Book now" pathway and describes in-network PacificSource and out-of-network billing arrangements.
- The captured site contained no online payment form, password field, or sensitive data-collection form, so payment and credential arrangements should be established through the practice's documented process rather than inferred from the page.

Summary Verdict

The available evidence is consistent with an established, apparently legitimate professional website and supports a high-trust, low-risk posture. The conclusion concerns the website’s observed trust characteristics and does not independently prove the real-world identity of its operator.

Infrastructure Integrity

The site is hosted directly on ONIAAS - HostPapa infrastructure in the United States, with no detected CDN or WAF layer and two likely origin addresses identified. This is a conventional hosting arrangement; the absence of an additional edge-protection layer limits the mitigating value of infrastructure controls but does not, by itself, indicate malicious activity.

Closing Assessment

Normal informational browsing and routine appointment consideration are proportionate, while independent professional-identity, service-term, and payment-protection checks should be completed before credentials or payments are provided.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of michelleconnollylpc.com.

- The request stayed on michelleconnollylpc.com. It was not redirected to another domain. CLEAR
- Registration is published under ENOM, INC.. CLEAR
- DNS for this domain is served by hostpapa.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-17. NOTED
- The earliest public archive of this site is from 2011-02-01. CLEAR
- It is hosted on ONIAAS, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about michelleconnollylpc.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
