

Is microsonic.hu a scam? TrustSniffer's high-risk assessment: 0/100

microsonic.hu

Verdict

0

OUT OF 100

CRITICAL RISK

microsonic.hu shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Official-looking Hungarian small business site (Microsonic-Labor Kft.) offering custom ear moulds, hearing protection products, and prosthetic eyes; includes contact details, phone number, appointment booking link, and payment guidance (cash/card).

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://www.microsonic.hu/>

What microsonic.hu served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2003.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This is a Hungarian local medical and manufacturing service website presenting appointment-led custom patient services, related product sales, and public-health reimbursement claims under the Microsonic-Labor Kft. name.

Scam/Impersonation Risk

Confirmed external threat indicators create a critical risk posture for sensitive interaction. The domain is reported as blacklisted, and multiple security providers recorded malicious detections. These signals outweigh the site's professional appearance and its otherwise ordinary local-service presentation. No separate identity inconsistency or brand-impersonation finding is present in the supplied evidence, but the confirmed blacklist status is sufficient to require a security-forward approach to credentials, payments, and other sensitive actions.

EVIDENCE

- External reputation checks recorded 6 malicious detections from 11 evaluated results, with a Tier-1 threat detection recorded.
- The domain is recorded as blacklisted by external sources.
- The domain registration record shows creation on 2003-03-20 and an age of 23.44 years.

Regulatory Verification Notes

The homepage identifies “MICROSONIC-LABOR KFT.” and describes custom ear moulds, prosthetic eyes, hearing-protection products, appointment booking, cash and card payment, and support through Hungary’s NEAK public-health system. The site content does not provide a license number or independently verified registration reference for these healthcare-related claims; this is a verification gap rather than, by itself, proof of fraud. Real-world operator identity remains unverified, and the available disclosure state is unclear. The absence of a matching broker-intelligence record provides no regulatory endorsement.

EVIDENCE

- The homepage title and visible business text identify “MICROSONIC-LABOR KFT.” and describe the stated medical and manufacturing services.
- The homepage menu includes “Impresszum” and downloadable documents, but the supplied content does not show a license or registration number.
- The site’s hosting artifact records AS16509 operated by Amazon.com, Inc. in the United States.
- The transport certificate is DV, issued by YR1, and valid until 2026-11-17.

What to Verify Next

Before any sensitive engagement, an independent party should confirm the legal entity and the claimed NEAK-supported services through the applicable Hungarian public registry or authority, using contact details obtained through an independent source rather than relying solely on the website. The appointment-booking destination and payment arrangements should also be confirmed independently, and no credentials or financial information should be submitted until those checks reconcile the site with the legitimate service provider.

EVIDENCE

- The homepage provides an appointment-booking link and publishes a telephone contact channel for independent comparison.
- The homepage states that products and services may involve cash, card, and public-health reimbursement, creating a need to validate the payment and reimbursement process outside the site.
- The site has no login form, password form, hidden form, or detected wallet-connection mechanism in the captured page behavior.

Summary Verdict

The overall posture is critical, with the available evidence indicating that the website should not be trusted for sensitive interaction. Its established registration history and coherent local-service content do not overcome the confirmed external threat and blacklist indicators. Identity verification remains incomplete.

Infrastructure Integrity

The website is served through Amazon’s CDN/WAF infrastructure, with the observed address belonging to the CDN edge rather than an independently observable origin. This provides a meaningful layer of exposure reduction, but protective hosting infrastructure is only a mitigating technical control and does not establish site legitimacy.

Closing Assessment

Treat the website as read-only pending independent confirmation of the operator and service claims, and avoid login, credential, payment, or other sensitive activity unless those checks produce a clear and trusted match.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of microsonic.hu.

- The request stayed on microsonic.hu. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2003-07-11. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about microsonic.hu at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
