

Is midasbuy.com legit? TrustSniffer's high-trust assessment: 92/100

midasbuy.com

Verdict

92
OUT OF 100

HIGH TRUST

midasbuy.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 70%.

What this site appears to be

Official-looking game top-up storefront (Midasbuy) offering payment channels, VIP, coupons, customer service links, and cookie consent. Promotional language emphasizes being an official Tencent recharge partner.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2014.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Midasbuy is a commercial game recharge and top-up storefront presenting itself as Tencent’s overseas third-party recharge store. It offers in-game currency and voucher purchases, payment channels, VIP benefits, coupons, customer support, account services, and regional promotions, with the apparent business model of selling virtual currency and related game-payment services.

Scam/Impersonation Risk

No blacklist, phishing, malware, or brand-impersonation contradictions were observed in the supplied evidence. The homepage makes the specific claim that Midasbuy is an “official recharge store by Tencent” and describes itself as “Tencent’s overseas third-party recharge store”; the available content supports an established commercial storefront, but the real-world operator behind that claim remains independently unverified. Runtime review recorded suspicious inline scripting and external network activity, yet did not identify hidden forms, externally submitted password forms, wallet activity, clipboard manipulation, cloaking, or credential-harvesting behavior. These observations are monitoring considerations rather than evidence of an impersonation scheme.

EVIDENCE

- The homepage presents Midasbuy as a Tencent official recharge store and describes services for PUBG UC and other games.
- The homepage and account-service interface provide sign-in, account-security, VIP, coupon, order-center, and customer-service functions without a detected hidden sensitive form.
- Domain registration records show registration on 2018-06-05, with an age of 8.18 years and expiry on 2027-06-05.
- Web-archive records contain 7 snapshots spanning 2014–2024, covering 11 tracked years.

Regulatory Verification Notes

The site’s apparent activity is ecommerce and game-payment facilitation rather than an activity for which a financial-services license is established by the supplied evidence. Licensing, registration, and the legal basis for the Tencent-partner representation should therefore be treated as verification items, not as evidence of wrongdoing. The available content references customer service, privacy, cookie, and payment-security policies, but it does not independently verify the operator’s legal identity. The domain is registered through MarkMonitor Information Technology (Shanghai) Co., Ltd., while the transport certificate identifies CENTAURI DYNAMIC

PTE. LTD.; this is useful administrative context, but it does not by itself establish the operator's relationship with Tencent. External reputation checks were clean, and no broker-dataset match was identified.

EVIDENCE

- The domain registrar is MarkMonitor Information Technology (Shanghai) Co., Ltd.; registration date is 2018-06-05 and expiry date is 2027-06-05.
- Hosting is on AS139341, ACE-AS-AP - ACE, SG.
- TLS uses DigiCert Secure Site OV G2 TLS CN RSA4096 SHA256 2022 CA1 with OV validation, issued to CENTAURI DYNAMIC PTE. LTD., valid through 2026-11-05.
- The homepage provides customer-service, privacy, cookie, payment-security, and user-protection references, but the supplied page evidence does not establish a license number or regulatory registration.

What to Verify Next

Before credential or payment interactions, an independent check should confirm that the domain is the officially designated recharge channel for the relevant game publisher, using a publisher-controlled source rather than the storefront's own statements. The operator's legal entity, merchant-of-record details, refund terms, and payment-protection arrangements should be checked against the applicable checkout and policy materials. Any support or account-recovery channel should be confirmed through an independently sourced official route, and payment should preferably use a method offering transaction dispute or chargeback protection.

EVIDENCE

- The storefront provides direct purchase, voucher-redemption, account, and order-management functions, making merchant and refund verification relevant before payment.
- The homepage offers sign-in/sign-up and account-security functions, making independent confirmation of the official account endpoint relevant before credential submission.
- Cookie and privacy controls are presented through the site's consent interface, providing policy material for review before account or payment use.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a low-risk commercial profile and no observed scam or impersonation contradictions. The trust posture is high, while independent verification of the real-world operator and its claimed publisher relationship remains incomplete.

Infrastructure Integrity

The site resolves to two likely origin addresses without a detected CDN or WAF layer. Direct origin exposure is a modest architectural consideration, but it does not constitute evidence of illegitimacy and does not outweigh the site's otherwise stable technical and reputation signals.

EVIDENCE

- Infrastructure resolution identified 2 unique IP addresses, including 2 likely origin candidates and 0 detected edge IPs.

Closing Assessment

Ordinary use is proportionate to the available evidence, subject to independent confirmation of merchant identity, official affiliation, refund terms, and payment protections before sensitive or financial interactions.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of midasbuy.com.

- The request stayed on midasbuy.com. It was not redirected to another domain. CLEAR
- Registration is published under MarkMonitor Information Technology (Shanghai) Co., Ltd.. CLEAR
- DNS for this domain is served by qq.com, across 3 name servers. NOTED
- The registration is paid up to 2027-06-05. NOTED
- The earliest public archive of this site is from 2014-01-01. CLEAR
- It is hosted on ACE-AS-AP, from a server in SG. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about midasbuy.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
