Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1999.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

MidiaNews is a Portuguese-language regional news publisher presenting politics, crime, opinion, local events, videos, polls and public-interest reporting, with an apparent advertising- and sponsored-content-supported media model rather than a financial-services business.

Scam/Impersonation Risk

No contradictions were observed. The homepage has the structure and content of an established local newsroom, with normal editorial sections, advertorial labeling and no login form, wallet function or sensitive-data collection identified. External reputation checks were clean, with no detected malicious or suspicious classification, phishing indication, impersonation signal or confirmed blacklist. The domain's long registration continuity and substantial historical presence further support an apparently established site, while not independently proving the identity of the current real-world operator.

EVIDENCE

- Homepage: Portuguese-language navigation covers politics, everyday affairs, courts, opinion, police, varieties, polls and local reporting; no sensitive form was identified.
- External reputation checks: 0 malicious detections, 0 suspicious detections, and no blacklist or phishing hit.
- Domain registration: Registered 1999-06-29 (~27.14 years old); expiry recorded as 2031-06-29.
- Web archive: 5,000 snapshots spanning 1999-11-28 to 2023-06-01, covering 25 tracked years with a maximum gap of 1 year.

Regulatory Verification Notes

The available material is consistent with a media publisher and does not indicate that the site offers a regulated financial product. The supplied site content does not present a licensing claim or registration number, which is a limited disclosure point for any commercial, sponsored or classified offer encountered through the publication; it is not, by itself, evidence of deception. The operator's real-world identity remains independently unverified, so the site's apparent legitimacy should not be treated as proof of a specific legal entity. No broker-dataset match was identified.

EVIDENCE

- Homepage: Displays “Expediente,” “Fale Conosco” and “Denuncie à Redação” navigation, together with a privacy-policy cookie notice.
- Homepage: Sponsored or paid informational material is identified through advertorial labeling.
- Hosting telemetry: Served from AS13335, Cloudflare, Inc., US.
- Transport security: TLS certificate issued by WE1 at DV validation level, valid to 2026-09-24 12:32:41 UTC.

What to Verify Next

Before credentials or payment details are provided in connection with any advertisement, sponsored offer or classified listing, independently confirm the commercial counterparty, applicable return or cancellation terms and the payment provider’s protection and dispute processes. Where a particular offer implies regulated activity, confirm the named provider and licensing status directly with the relevant Brazilian registry rather than relying on the publication page. Contact details should also be cross-checked through an independently sourced channel when a transaction or sensitive request is involved.

EVIDENCE

- Homepage: Provides newsroom contact and editorial-reporting entry points that can be compared with independently sourced contact information.
- Homepage: Contains a privacy-policy notice and standard editorial navigation rather than an account or payment workflow.
- Business-model assessment: Advertising, sponsored content and possible classifieds or public notices are identified as the apparent revenue mechanisms.

Summary Verdict

The overall posture is **high trust and low risk**, and the evidence is consistent with an established, apparently legitimate website. The classification supports ordinary browsing and routine interaction with the publication, while the absence of independently verified operator identity prevents treating the site’s real-world ownership as proven.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were CDN edge servers; no origin-server candidate was identified. This provides a meaningful mitigation against direct origin exposure and routine network abuse, but it is a protective control rather than proof of legitimacy.

EVIDENCE

- Hosting infrastructure: Four observed addresses were Cloudflare edge addresses: 104.21.37.230, 172.67.214.173, 2606:4700:3036::ac43:d6ad and 2606:4700:3037::6815:25e6.
- CDN posture: All four observed addresses were associated with AS13335; likely origin IP count was 0.

Closing Assessment

Normal reading and routine site interaction are proportionate to the assessed posture; independent counterparty, terms and payment-protection checks should precede any credential or payment action arising from a commercial offer.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of midianews.com.br.

- The request stayed on midianews.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2031-06-29. CLEAR
- The earliest public archive of this site is from 1999-11-28. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about midianews.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
