Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is a corporate IT consulting website presenting Mindnew Software Consulting Pvt Ltd as a provider of SAP implementation and support, cloud migration and hosting, Internet of Things, big-data analytics, digitalization, infrastructure architecture, and managed services for corporate and government clients. Its apparent business model is informational B2B marketing for professional-services engagements, support contracts, and technology projects, with contact and office details provided for prospective clients.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence, including no phishing, impersonation, or malicious-content indicators. The website presents a coherent corporate-services profile rather than a deceptive investment or consumer-payment model, and its pages contain no login form, sensitive submission form, hidden form, wallet interaction, or suspicious external posting behavior. Its claims—such as offering expert SAP and digitalization services and helping clients improve business performance—are commercial positioning statements, not independently verified proof of performance, but they do not constitute fraud indicators. The domain also shows sustained historical continuity rather than evidence of suspicious repurposing, supporting an apparently established web presence.

EVIDENCE

- The homepage identifies Mindnew Software Consulting Pvt Ltd and describes SAP, cloud, IoT, big-data, digitalization, and managed-service offerings; page-level review recorded zero red flags.
- Interactive testing recorded 0 external XHR requests, 0 hidden forms, 0 password-external forms, and 0 wallet-drainer runs across 2 successful runs.
- Domain registration: 2015-11-07T08:18:45Z; age 10.79 years.
- Web history: 345 snapshots from 2017-02-16T01:46:18Z through 2026-04-16T01:58:37Z, covering 10 years with a maximum recorded gap of 1 year.

Regulatory Verification Notes

The site presents a named business identity and an office/contact presence, but the real-world operator has not been independently verified. No license, registration number, or licensing authority is identified in the supplied site content; for an IT consulting business this is primarily a corporate-disclosure and counterparty-verification gap rather than evidence of a scam. The available reputation checks were clean, and registration through GoDaddy.com, LLC, together with the site's established content and technical continuity, is consistent with a legitimate operating website. The absence of a broker-dataset match provides no regulatory conclusion.

EVIDENCE

- The page title and homepage identify "Mindnew Software Consulting Pvt Ltd"; the contact content includes an office address and contact details.
- Domain registrar: GoDaddy.com, LLC.
- Hosting: AS47583 (AS-HOSTINGER - Hostinger International Limited, CY).
- TLS certificate: issuer YE2, validation level DV, valid to 2026-09-20T22:22:00+00:00.

What to Verify Next

Before a formal engagement, the prospective counterparty should independently confirm that the named company is a currently registered entity and that the contracting representative is authorized to bind it. For any project involving access to corporate systems or sensitive data, procurement should validate the statement of work, security responsibilities, data-processing terms, and escalation contacts through independently sourced business records. Before credential or payment interactions, ordinary checks of merchant identity, contractual terms, payment protections, and applicable return or cancellation provisions should be completed.

EVIDENCE

- The homepage and service pages provide the stated business model and service scope to compare against any proposed contract.
- The contact page provides the communication and office details that should be matched against independently obtained corporate records.
- The careers, news, and service-page structure offers additional consistency checks against the entity and engagement presented during procurement.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate corporate website and supports a high-trust, low-risk posture. The conclusion concerns website trust and observed behavior; it does not independently prove the real-world identity of the operator.

Infrastructure Integrity

The site resolves directly to hosting infrastructure associated with Hostinger International Limited and AS47583, with four likely origin addresses and no CDN detected. This configuration does not provide the additional masking or edge-layer resilience associated with a CDN/WAF deployment, but the resolved infrastructure is technically coherent and is a mitigating operational signal rather than proof of operator identity.

Closing Assessment

Normal informational use is proportionate to the evidence, while credential or payment interactions should follow standard independent counterparty, contractual, and payment-protection checks.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mindnewconsulting.com.

- The request stayed on mindnewconsulting.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-07. NOTED
- The earliest public archive of this site is from 2017-02-16. CLEAR
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mindnewconsulting.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
