Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is an established public-sector portal for Colombia's Ministerio de Educación Nacional, presenting institutional information, education policy, news, transparency resources, and citizen-service channels rather than a commercial or user-monetized business.

Scam/Impersonation Risk

No contradictions were observed. The site's content is consistent with a government ministry portal, with no detected phishing, brand-impersonation, malicious-content, or suspicious-form indicators. External reputation checks were clean, and the site has an established public web presence. The real-world operator identity remains likely rather than independently proven, so the positive assessment reflects convergence of the available evidence rather than definitive proof of ownership.

EVIDENCE

- The homepage is titled "Inicio | Ministerio de Educación Nacional" and is classified as a government and public-service site; no red flags were identified in the captured content.
- The domain was registered on 1998-06-24 and is approximately 28.16 years old; registrar: www.registrocolombia.co.
- Reputation checks for the domain recorded zero malicious and zero suspicious detections, with no phishing or blacklist contradiction identified.

Regulatory Verification Notes

The legal and institutional presentation identifies the Ministerio de Educación Nacional and describes public administration, education policy, transparency, and citizen services. No commercial financial activity or licensing claim is presented, so a conventional financial-services licensing assessment is not indicated by the stated business model. The site's disclosure position is therefore best treated as an administrative transparency matter, while the ministry identity should remain described as apparent rather than independently verified.

EVIDENCE

- The institutional content identifies the “Ministerio de Educación Nacional” and includes government branding, ministerial offices, education divisions, transparency information, and public-service procedures.
- The site’s transport encryption uses an OV certificate issued by GeoTrust TLS RSA CA G1, with subject organization “Ministerio de Educación Nacional,” valid through 2027-03-21.
- The site is served through AS27951, Media Commerce Partners S.A, CO; the resolved infrastructure is registered within the LACNIC region.

What to Verify Next

For any credential or payment interaction arising from a specific service, independently confirm that the request originates from an official ministry channel and that the relevant service terms and payment protections are clear. Where a transaction or external provider is involved, confirm the provider’s identity through an independently obtained government contact route rather than relying solely on an embedded link.

EVIDENCE

- The homepage navigation includes “Transparencia y Acceso a la Información Pública,” providing an official route for checking institutional disclosures.
- The citizen-services area includes “Canales de atención” and “PQRSDF,” which can support independent confirmation of service requests.
- The portal provides a search function and institutional navigation covering ministerial offices, education services, and public procedures.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate government website. The overall posture is high trust and low risk, with no observed scam or impersonation contradictions; however, the operator identity is assessed as likely rather than independently verified.

Infrastructure Integrity

The site resolves directly to infrastructure operated by Media Commerce Partners S.A under AS27951, with no CDN or WAF detected and a likely origin address exposed. This direct hosting posture is a neutral infrastructure characteristic, while the valid OV certificate provides a mitigating transport-integrity signal but does not independently prove legitimacy.

Closing Assessment

Routine informational use is proportionate to the available evidence; before submitting credentials or making any payment, ordinary independent checks of the official entity, applicable terms, and payment protections should be completed.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Identity verified on page
- Trusted social count=5

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [mineducacion.gov.co](#).

- The request stayed on [mineducacion.gov.co](#). It was not redirected to another domain. [CLEAR](#)
- Registration is published under [www.registrocolombia.co](#). [CLEAR](#)
- DNS for this domain is served by [com.co](#), across 2 name servers. [NOTED](#)
- The registration is paid up to 2026-12-31. [NOTED](#)
- It is hosted on AS27951, from a server in CO. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [mineducacion.gov.co](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
