

Is minhaconexao.com.br legit? TrustSniffer's high-trust assessment: 90/100

minhaconexao.com.br

Verdict

90

OUT OF 100

HIGH TRUST

minhaconexao.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Portuguese-language website offering an internet speed test (Minha Conexão), explanatory content on ping/download/upload, guidance to improve connections, and ISP rankings. Contains account/login links, partner/server hosting info, and calls to save test history. No signs of credential harvesting or financial investment solicitation.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Portuguese-language internet utility and information service centred on “Minha Conexão,” presenting an internet speed test, explanations of ping, download and upload performance, connection-improvement guidance, ISP rankings, and comparisons of residential, mobile, television, telephone, and bundled plans. Its apparent business model combines free utility content with advertising, ISP partnerships, provider listings, and hosted partner test servers.

Scam/Impersonation Risk

No contradictions were observed. The site’s homepage presents a coherent consumer utility rather than a financial solicitation, credential-harvesting page, or impersonation of a recognised brand; the supplied analysis found no phishing, malicious-content, or brand-impersonation indicators. The long-running domain and continuous historical presence provide strong provenance support, while the operator’s real-world identity remains independently unverified and should not be treated as proven solely from the website or domain record.

EVIDENCE

- Domain registration: 2007-02-03; age 19.54 years; expiry 2036-02-03.
- Web archive: 1,494 snapshots from 2007-02-06 through 2026-07-04, spanning 20 years with a maximum observed gap of 1 year.
- The homepage was assessed with 0 malicious detections, 0 suspicious detections, and no blacklist finding; the page analysis recorded no red flags.

Regulatory Verification Notes

The site presents an informational and connectivity-testing service, with commercial activity through advertising, ISP partnerships, provider comparisons, and referrals rather than an apparent regulated financial product. No license, registration number, or regulated-authority claim is presented in the supplied site content; this is a transparency item to assess only if a particular plan, referral, or partner activity creates a licensing obligation. The available evidence is consistent with an established site, but it does not independently verify the legal entity operating the service. A mid-level page-authority signal offers contextual support only and is not a legal or licensing determination.

EVIDENCE

- The homepage and plan/provider pages describe speed testing, ISP rankings, plan comparisons, partner participation, and provider-server hosting.
- Hosting telemetry: AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- TLS telemetry: issuer WE1; validation level DV; valid through 2026-10-04T08:03:59+00:00.

What to Verify Next

Before credential or payment interactions, an enterprise or consumer should independently confirm the operator associated with the relevant account or commercial offer, review the applicable service terms and any return or cancellation provisions, and confirm available payment-protection mechanisms. Where a specific partner or telecommunications offer is being promoted, the provider's own official channel should be used to confirm that the listing and commercial terms are current. Official contact channels should also be confirmed through an independent route before resolving account or billing issues.

EVIDENCE

- The site exposes login, registration, account-history, partner, provider-panel, and server-hosting functions.
- The homepage links to provider plans, rankings, guides, and partner services, creating several distinct commercial interaction paths.
- The site's stated business model includes advertising, ISP partnerships, referral or provider listings, and hosted test servers.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam or impersonation contradiction was identified, although the real-world operator identity is not independently verified; legitimacy should therefore be described as evidence-consistent rather than proven.

Infrastructure Integrity

The site is protected by Cloudflare's CDN/WAF infrastructure, with observed addresses belonging to CDN edge servers rather than an identified origin candidate. This reduces direct origin exposure and is a mitigating infrastructure characteristic, but it is not proof of operator legitimacy; the observed hosting provider is Cloudflare, Inc., on AS13335.

Closing Assessment

Routine informational use is proportionate; before submitting credentials or making any payment-related commitment, ordinary independent checks of the relevant counterparty, terms, and payment protections should be completed.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of minhaconexao.com.br.

- The request stayed on minhaconexao.com.br. It was not redirected to another domain. [CLEAR](#)
- DNS for this domain is served by cloudflare.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2036-02-03. [CLEAR](#)
- The earliest public archive of this site is from 2007-02-06. [CLEAR](#)
- It is hosted on CLOUDFLARENET, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about minhaconexao.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
