

Is minyagg.com a scam? TrustSniffer's high-risk assessment: 0/100

minyagg.com

Verdict

0

OUT OF 100

CRITICAL RISK

minyagg.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Local government food and drug supervision site with news, policy documents, administrative guidance, contact info and service links. Page content includes repeated spammy gambling-related strings in titles which suggest SEO spam or content injection but the underlying site appears to be a governmental informational portal.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What minyagg.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website presents itself as a local public-sector information portal for food and drug supervision, offering regulatory news, policy documents, administrative notices, public announcements, and guidance concerning food, medicines, medical devices, and related services. Its apparent operating model is informational rather than commercial, but the homepage also contains repeated gambling-related SEO strings that are inconsistent with that stated public-service purpose.

Scam/Impersonation Risk

The site carries a **critical interaction risk** because external threat intelligence records multiple malicious detections and a confirmed blacklist status. This is materially inconsistent with the site's apparent government-information function and indicates that the domain or its content should not be treated as trustworthy for sensitive activity. The homepage's title and repeated content strings contain gambling-related terms unrelated to food and drug supervision, consistent with SEO spam or possible content injection. No identity contradiction or direct brand-impersonation indicator was observed, and no login or sensitive submission form was detected;

these observations do not offset the confirmed external threat signals. The site should therefore be treated as suitable, at most, for strictly passive inspection until independently cleared.

EVIDENCE

- The homepage title is “casino38365-365-365bet开户官网-365365,” while the visible page content concerns local food and drug supervision.
- The homepage contains repeated gambling-related strings embedded in article titles and summaries alongside government-policy content.
- External intelligence recorded 15 malicious detections among 20 evaluated results and a confirmed blacklist status.
- Historical records for the domain span 2013-08-18 through 2026-02-10, covering 14 years of tracked history.

Regulatory Verification Notes

The pages present an apparent public-sector identity through government news, policy, administrative guidance, and service information, but the real-world operator remains unverified. No licensing claim or license number is presented for verification; because the apparent business model is informational, this is principally an identity and disclosure gap rather than evidence of a financial-service authorization. The available content does not establish that the domain is an official government property, and the gambling-related title contamination further weakens confidence in the site's current content governance. The domain's registration uses NameSilo, LLC, with privacy-protected registrant details; this is an administrative limitation and should not be treated by itself as proof of misconduct.

EVIDENCE

- Domain registration date: 2017-12-22T05:27:10Z; registered for 8.67 years, with expiration on 2026-12-22T05:27:10Z.
- The site's transport encryption uses a DV certificate issued by YR2, valid to 2026-10-07T13:26:17+00:00, with 47 days remaining.
- The homepage and information sections describe food safety, drug supervision, medical devices, policy, notices, and public-service guidance, but no license authority or license number is stated.
- The available broker-reputation dataset returned no match; this is contextual only and does not validate the site's legal identity.

What to Verify Next

Before any sensitive interaction, an institution should confirm the domain through an independently sourced government directory or an offline contact route rather than relying on the website's own assertions. The apparent agency name, publication history, and service links should be compared with an independently verified official domain, and any applicable government-domain or public-sector registration should be confirmed with the relevant authority. The site should also undergo endpoint and content-integrity review to determine whether the unrelated gambling material reflects compromise, unauthorized publishing, or deliberate misuse.

EVIDENCE

- The homepage has no detected login form, hidden sensitive form, or external password-submission destination.
- Behavioral testing recorded two successful runs, with zero external XHR or fetch activity and no detected cloaking.
- The page identifies its content type as informational/government, while its title and embedded strings are inconsistent with that classification.
- The site uses the “大汉版通发布系统” content-management system, as identified in the page technology analysis.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. Apparent informational legitimacy is outweighed by confirmed external threat and blacklist signals, unresolved operator identity, and material content inconsistency. The evidence does not support treating the domain as an established official service.

Infrastructure Integrity

The site resolves directly to PEG-LA - PEG TECH INC in the United States on AS398823, with one identified IP and no detected CDN or WAF edge layer. This infrastructure provides no meaningful protective mediation between the visitor and the identified hosting endpoint, so transport security should not be confused with site legitimacy.

Closing Assessment

Sensitive actions—including account authentication, credential submission, financial activity, downloads, or reliance on official instructions—should not proceed through this domain; any necessary investigation should remain passive and be conducted through independently verified official channels.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of minyagg.com.

- The request stayed on minyagg.com. It was not redirected to another domain. CLEAR
- Registration is published under NameSilo, LLC. CLEAR
- DNS for this domain is served by dnsowl.com, across 3 name servers. NOTED
- The registration is paid up to 2026-12-22. NOTED
- The earliest public archive of this site is from 2013-08-18. CLEAR
- It is hosted on PEG-LA, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about minyagg.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
