

Is miraquienhablagdl.com a scam? TrustSniffer's high-risk assessment: 0/100

miraquienhablagdl.com

Verdict

0

OUT OF 100

CRITICAL RISK

miraquienhablagdl.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Official site for 'Mira Quién Habla', an AVE conference series presenting speaker biographies, past talks, gallery and contact/ticket information. Focused on advertising, marketing and creative industry events in Mexico.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

José Alberto Terán

What miraquienhablagdl.com served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Mira Quién Habla is an event and conference website presenting the AVE conference series in Mexico, with speaker biographies, conference sessions, historical talks, a gallery, and ticket or contact information; its apparent business model is event promotion supported by ticket sales and sponsorships.

Scam/Impersonation Risk

Confirmed external threat contradictions materially outweigh the site's otherwise professional presentation. The site is externally blacklisted, and multiple threat-intelligence detections classify the domain as malicious or suspicious. The available page content does not itself show brand impersonation, phishing forms, or conflicting legal identities, and the homepage presents a coherent conference-oriented purpose; however, those benign content characteristics do not resolve the confirmed reputation conflict. Sensitive interaction with the site should therefore be treated as high risk.

EVIDENCE

- The site's external reputation assessment records 12 malicious detections and 4 suspicious detections among 21 effective detections, with a confirmed blacklist indication.
- The homepage presents “MIRA QUIÉN HABLA” as the official AVE conference cycle and contains speaker, programme, and past-event material rather than an obvious credential-harvesting interface.
- Domain registration records show registration on 2018-08-07, with an age of 8.04 years.
- Archive coverage records first observation on 2019-05-20 and last observation on 2025-07-12, with 7 years tracked.

Regulatory Verification Notes

The site presents an event and informational business model rather than a financial service, and the available content does not state a regulatory licence, licence number, or registration authority. That is a verification gap concerning the legal basis of ticket sales, sponsorship arrangements, and any payment recipient, but it is separate from the external threat findings addressed above. The real-world operator identity remains unverified; on-site references to AVE and featured industry participants should not be treated as independent proof of legal affiliation. The use of private registration details is an administrative limitation rather than, by itself, an identity contradiction.

EVIDENCE

- The homepage identifies the offering as the AVE conference cycle and provides event, speaker, gallery, and ticket/contact content.
- The analysed business-model record indicates no claimed licence, licence authority, or licence number.
- The site's transport encryption uses a DV certificate issued by YR1, valid through 2026-11-04T13:00:40+00:00.

What to Verify Next

Before any ticket purchase or other sensitive transaction, an independent party should confirm the event organiser and payment recipient through AVE or a known offline contact route, validate any applicable commercial registration or event-related authorisation with the relevant Mexican registry, and confirm that the ticketing and refund terms are issued by the same legal entity receiving payment. Payment should be made only through a transaction method offering meaningful dispute and chargeback protections.

EVIDENCE

- The homepage supplies speaker biographies and historical conference references that can be compared against independently obtained AVE event records.
- The site provides ticket and contact functions, making confirmation of the payment recipient and refund process a material pre-transaction check.
- The site contains no sensitive login form, hidden form, or externally hosted password form in the observed page behaviour.

Summary Verdict

The website has a **critical trust posture** because confirmed external malicious and blacklist signals create a material contradiction with its otherwise coherent event presentation. The operator’s real-world identity is not independently verified, and the available evidence does not support treating the domain as suitable for sensitive interaction.

Infrastructure Integrity

The domain resolves directly to a single likely origin address, with no detected CDN or WAF layer. Its hosting is associated with Oracle infrastructure in the United States; this provides a technically identifiable hosting path but does not establish legitimacy or offset the external reputation risk.

EVIDENCE

- Served from AS31898, identified as ORACLE-BMC-31898 – Oracle Corporation, US.
- Infrastructure resolution identifies 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- The resolved address is 108.179.194.44, with ARIN identified as the registry.

Closing Assessment

Sensitive actions should not proceed unless the organiser, payment recipient, and transaction protections are independently confirmed through trusted channels.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of miraquienhablagdl.com.

- The request stayed on miraquienhablagdl.com. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by prodns.mx, across 2 name servers. NOTED
- The registration is paid up to 2027-08-07. NOTED
- The earliest public archive of this site is from 2019-05-20. CLEAR
- It is hosted on ORACLE-BMC-31898, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about miraquienhablagdl.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
