

Is mirpol-bud.pl safe? TrustSniffer's low-trust assessment: 40/100

mirpol-bud.pl

Verdict

40

OUT OF 100

LOW TRUST

mirpol-bud.pl is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

MIRPOL is a Polish architectural studio offering design and construction services for houses, developer projects, public and industrial buildings. The site includes service descriptions, portfolio links, contact details, opening hours, and a contact form.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://mirpol-bud.pl/

What mirpol-bud.pl served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

mirpol-bud.pl presents MIRPOL as a Polish architectural and construction-design studio serving individual homeowners and developers. The site promotes house designs, developer projects, public and industrial buildings, construction execution, project portfolios, pricing information, office details, and a contact form, indicating a paid professional-services business model.

Scam/Impersonation Risk

A confirmed blacklist finding creates a material security concern despite the site's coherent architectural-studio presentation and the absence of page-level phishing, impersonation, credential-harvesting, or sensitive-login indicators. External reputation checks also recorded one malicious and one suspicious detection, so the site's benign appearance and professional content should not be treated as sufficient assurance for sensitive engagement. No identity contradiction or direct brand-impersonation signal was observed, but the confirmed blacklist is a substantive contradiction requiring a clearly cautionary posture.

EVIDENCE

- The homepage and service pages describe architectural design, construction supervision, and development-related work rather than a credential, investment, or cryptocurrency proposition.
- The contact page contains a standard contact form; testing identified no login form, hidden form, password submission, wallet connection, or external password-post destination.
- Domain registration: 2008-05-30, approximately 18.23 years old.
- Web-archive record: 51 snapshots spanning 2011–2025, covering 15 tracked years.

Regulatory Verification Notes

The About, Offer, Pricing, and Contact pages provide a reasonably coherent description of MIRPOL's services and operating context, but the available material does not state a professional license, registration number, or licensing authority. That is a regulatory-transparency gap rather than proof of fraudulent conduct. The site's apparent connection to a real-world business is assessed as likely, not independently verified; the blacklist finding therefore remains the decisive reputational concern. The site should not be treated as a regulated entity on the evidence supplied.

EVIDENCE

- The About page describes support from initial concept through building-permit proceedings and final acceptance, while the Offer pages identify residential, developer, public, and industrial building services.
- The Contact page provides office information, opening hours, and a contact mechanism, but the reviewed legal and identity content does not provide a license number or named licensing authority.
- TLS certificate: issuer YE1, domain validation (DV), valid through 2026-10-02.

What to Verify Next

Before any contract, deposit, transfer of drawings, or exchange of sensitive business information, an independent business-registry search should confirm the operating entity and its authorized representatives. Where the proposed work requires regulated professional authorization, the relevant Polish registry should independently confirm the responsible architect or contractor. Project references, office details, bank-account ownership, contractual terms, insurance, refund or termination provisions, and payment protections should be checked through independently obtained channels rather than relying solely on information supplied by the website.

EVIDENCE

- The site's About, Offer, Pricing, and Contact pages provide the records that should be reconciled against independent business and professional-registration information.
- The site's stated design-to-construction service model makes confirmation of the contracting entity, responsible professionals, and payment recipient material before financial commitment.
- The website publishes one social-media destination, so independent confirmation should not rely solely on that online association.

Summary Verdict

The website has a plausible local-business presentation and several sound technical and content characteristics, but its overall trust posture is low because a confirmed blacklist contradiction materially outweighs those benign indicators. Identity linkage is likely rather than proven, and sensitive interaction risk remains elevated.

Infrastructure Integrity

The site is served through OVH - OVH SAS in France on AS16276, with observed addresses functioning as CDN/WAF edge infrastructure and no origin candidate identified. This provides some exposure mitigation and operational resilience, but protective hosting infrastructure does not establish legitimacy or offset the external reputation concern.

EVIDENCE

- Hosting infrastructure: AS16276, OVH - OVH SAS, France.
- Two observed edge addresses were associated with AS16276; zero likely origin candidates were identified.
- The site's transport encryption uses a DV TLS certificate issued by YE1, valid to 2026-10-02.

Closing Assessment

Pending independent confirmation of the operating entity, professional authorizations, contracting arrangements, and payment safeguards, engagement should remain limited to non-sensitive review; credentials, confidential information, and financial commitments should not be provided.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mirpol-bud.pl.

- The request stayed on mirpol-bud.pl. It was not redirected to another domain. CLEAR
- Registration is published under OVH SAS. CLEAR
- DNS for this domain is served by ovh.net, across 2 name servers. NOTED
- The registration is paid up to 2027-05-30. NOTED
- The earliest public archive of this site is from 2011-02-08. CLEAR
- It is hosted on OVH, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mirpol-bud.pl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
