

Is mishto.org safe? TrustSniffer's moderate-trust assessment: 50/100

mishto.org

Verdict

50

OUT OF 100

MODERATE TRUST

mishto.org is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

A minimal WordPress default blog page containing the default "Hello world!" post and basic site chrome. No forms, monetization, or external/social links present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

MY BLOG

Just another WordPress site

What mishto.org served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2003.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

mishto.org presents as a minimal WordPress blog titled "My blog," displaying the default "Hello world!" post, basic search and comment elements, and no visible commercial, financial, or account-based business model. Its apparent purpose is personal or small-scale informational publishing rather than transactional services.

Scam/Impersonation Risk

A confirmed blacklist condition and multiple external malicious detections create a significant contradiction to the otherwise quiet presentation of the homepage. The site does not display a login form, payment flow, wallet connection, or overt impersonation of a named brand, and no conflicting legal identities were observed; however, the absence of active abuse mechanics during inspection does not resolve the external reputation concern. The appropriate posture is therefore explicitly cautionary for credentials, financial activity, or other sensitive interaction.

EVIDENCE

- External reputation telemetry recorded 4 malicious detections and blacklist status across 2 external sources.
- The homepage contains only the default WordPress “Hello world!” post, with 0 forms, no login form, and no visible monetization or payment flow; observed behavior recorded 0 external network requests and 0 wallet-connection runs across 2 successful runs.
- Domain registration telemetry records creation on 2024-11-05 and an age of 1.79 years.
- Web-archive telemetry records 49 snapshots spanning 2003–2025, with 23 years tracked.

Regulatory Verification Notes

The site’s apparent identity remains unverified because the available homepage does not identify an operating company, responsible individual, corporate registration, license number, or regulated status. This is a disclosure gap rather than proof of fraud, but it is material because the external reputation contradiction makes reliance on the site’s minimal presentation inappropriate for regulated or financial engagement. No matching broker-reputation record was identified in the supplied third-party context.

EVIDENCE

- The homepage identifies the site only as “My blog” and “Just another WordPress site,” without an operator name or regulatory disclosure.
- The domain is registered through Realtime Register B.V.; the observed registration expiry is 2026-11-05.
- Hosting resolves through AS5606, identified as GTS-BACKBONE - GTS Telecom SRL, RO.
- The site’s transport encryption uses a DV TLS certificate issued by YR2, valid to 2026-10-07T11:27:14+00:00.

What to Verify Next

Before any sensitive interaction, an independent registry or authoritative corporate source should be used to establish who operates the domain and whether any claimed activity requires licensing. Contact channels should be confirmed through an independently sourced route rather than relying solely on information presented by the site. Any proposed login, credential submission, or financial transfer should remain suspended until the external reputation condition has been investigated and resolved.

EVIDENCE

- The homepage provides no operator, licensing, or corporate-registration details from which an independent verification can begin.
- The visible site is a default WordPress installation with no stated commercial service, transaction mechanism, or account function.
- The available identity-verification status is unverified, with no independent identity signals supplied.

Summary Verdict

The overall posture is **cautionary and unsuitable for sensitive interaction**. The site’s benign, minimal content does not provide sufficient assurance to overcome the external contradiction, while the real-world operator

identity remains unverified. Passive viewing is distinguishable from relying on the site for credentials, account access, or financial activity.

Infrastructure Integrity

The site is served directly through infrastructure associated with GTS-BACKBONE - GTS Telecom SRL in Romania, without an identified CDN or WAF layer and with one likely origin IP. A DNS heuristic resembling fast-flux behavior was recorded, but that heuristic is unconfirmed and should not be treated as standalone proof of malicious infrastructure.

EVIDENCE

- Hosted on AS5606 (GTS-BACKBONE - GTS Telecom SRL, RO).
- Resolved infrastructure includes 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- TLS validation level is DV; issuer is YR2; certificate validity ends 2026-10-07T11:27:14+00:00.

Closing Assessment

Prospective users should restrict activity to passive inspection and avoid login, credential submission, or financial transactions until the operator identity and external reputation issue have been independently resolved.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mishto.org.

- The request stayed on mishto.org. It was not redirected to another domain. CLEAR
- Registration is published under Realtime Register B.V.. CLEAR
- DNS for this domain is served by roserve.net, across 2 name servers. NOTED
- The registration is paid up to 2026-11-05. NOTED
- The earliest public archive of this site is from 2003-12-18. CLEAR
- It is hosted on GTS-BACKBONE, from a server in RO. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mishto.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
