The page as captured

<https://missgypsywhitemoon.com.au/>

What missgypsywhitemoon.com.au served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Miss Gypsy White Moon is a “Launching Soon” promotional website that presents a branded landing page, an email-subscription form for launch updates, a cookie notice, and no current login, purchasing, or other transaction capability.

Scam/Impersonation Risk

Confirmed external reputation contradictions materially elevate the risk of sensitive interaction. The domain is recorded as blacklisted by multiple external sources, with multiple malicious detections and one security vendor flag. This is not reconciled by the benign appearance of the captured page: the site’s limited functionality reduces the currently observed attack surface but does not establish that future content, redirects, or subscription handling will be safe. Runtime observation also recorded unusually extensive external communication, including non-whitelisted requests and outbound posts, although no hidden forms, password collection, wallet connection, clipboard manipulation, or cloaking was observed. Abuse reports associated with the observed IP are attributed to shared CDN infrastructure rather than uniquely to the domain; that attribution

limits specificity but does not remove the separate domain-level blacklist findings. No identity inconsistency or direct brand-impersonation finding was observed.

EVIDENCE

- External reputation telemetry recorded 5 malicious detections and 1 suspicious detection for the domain, with a Tier-1 security vendor among the flagging sources; the domain was also present on an external blacklist.
- The observed IP address 13.248.243.5 had 7 abuse reports, attributed to Amazon Technologies Inc. shared CDN infrastructure with a confidence score of 15.
- Runtime testing recorded 109 external XHR requests, 104 non-whitelisted XHR requests, 2 external posts, and 2 non-whitelisted posts.
- The homepage contained no login form, hidden form, password submission, wallet connection, or clipboard-writing behavior.

Regulatory Verification Notes

The captured site is a preliminary promotional page rather than an operating financial or commerce interface. It does not present a company name beyond “Miss Gypsy White Moon,” a registration number, licensing information, terms, returns framework, or a clearly identified regulated activity. These are disclosure gaps requiring verification if the site later introduces sales, subscriptions, financial services, or other regulated offerings; they are not, by themselves, proof of fraud. Registration telemetry identifies GoDaddy.com LLC trading as GoDaddy.com as registrar and Katherine Willis as the recorded registrant, but this does not independently verify that person’s connection to the website’s operating entity. The available evidence is therefore insufficient to establish the real-world operator’s identity.

EVIDENCE

- The homepage is labelled “Launching Soon” and provides only an email-signup mechanism for updates.
- No company, licensing, registration, terms, or regulated-service disclosure is present in the captured homepage content.
- Domain age is 8.48 years based on registration continuity.
- Hosting telemetry identifies AS16509, AMAZON-02 - Amazon.com, Inc., US; the registrar is GoDaddy.com LLC trading as GoDaddy.com.
- The site uses a DV TLS certificate issued by GoDaddy TLS Intermediate CA DV - R1v1, valid to 2026-10-25T19:05:40+00:00.

What to Verify Next

Before any future account creation, payment, or other sensitive interaction, the operator should be independently confirmed through an offline or independently sourced contact route, and any claimed company or licence should be checked against the relevant official registry. If the site later adds purchasing or subscription functionality, its terms, cancellation rights, privacy disclosures, refund process, payment beneficiary, and checkout domain should be reviewed before transaction approval. Any material change from the current landing page should be reassessed because the present capture does not demonstrate how a later operating service will function.

EVIDENCE

- The homepage currently contains one form of type email_subscribe and no sensitive form.
- The captured page states “Sign up to be the first to get updates,” indicating that its present function is lead collection rather than completed commerce.
- The site is identified as built with the Airo AI Builder and contains no internal or external navigation links in the captured page.

Summary Verdict

The website has a **critical trust posture** for sensitive interaction. Its benign coming-soon presentation does not offset the confirmed external reputation contradictions, and the available evidence does not independently verify the operating entity. Interaction should be treated as unsuitable for credentials, payments, or other consequential activity.

Infrastructure Integrity

The site is fronted by a CDN/WAF layer operated through Amazon infrastructure. Both observed addresses are CDN edge servers, with the origin server not observable in this analysis; this provides some exposure mitigation but is not evidence of legitimacy.

EVIDENCE

- CDN/WAF edge IPs observed: 13.248.243.5 and 76.223.105.230.
- Both edge addresses resolve through AS16509, Amazon Technologies Inc.; no likely origin IP was identified.

Closing Assessment

The appropriate enterprise disposition is to block or defer sensitive interaction until the external reputation issue and the website operator’s independent identity have been resolved through authoritative evidence.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 7 reports on hosting IP 13.248.243.5 (Amazon Technologies Inc., Content Delivery Network), 15% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of missgypsywhitemoon.com.au.

- The request stayed on missgypsywhitemoon.com.au. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com LLC trading as GoDaddy.com. [CLEAR](#)
- DNS for this domain is served by domaincontrol.com, across 2 name servers. [NOTED](#)
- The earliest public archive of this site is from 2013-04-08. [CLEAR](#)
- It is hosted on AMAZON-02, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about missgypsywhitemoon.com.au at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
