

Is mixcloud.com legit? TrustSniffer's high-trust assessment: 100/100

mixcloud.com

Verdict

100

OUT OF 100

HIGH TRUST

mixcloud.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-12 by automated analysis. Classification confidence 55%.

What this site appears to be

Public Mixcloud homepage promoting listener and creator features (Pro and Premium), showcasing live shows, trending mixes and creator discovery. Calls to action include Sign up, Login, Upload, and Upgrade to paid tiers.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Mixcloud is a creator-focused audio-streaming platform presenting DJ mixes, radio shows, podcasts, live broadcasts, trending content, and creator discovery. Its apparent business model combines free listening and uploading with paid Premium subscriptions for listeners, Pro subscriptions for creators, and creator monetization features such as tips and subscriptions.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing, impersonation, blacklist, malicious-detection, or conflicting-identity findings. The homepage presents a coherent audio-platform model with ordinary sign-up, login, upload, and subscription functions, rather than deceptive investment, payment, or credential-harvesting mechanics. The established domain history, strong public traffic footprint, clean external reputation, and absence of detected abuse patterns support an apparently legitimate, low-risk assessment, although the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage identifies the service as “Mixcloud - This is Audio Culture” and presents DJ mixes, radio shows, podcasts, live shows, genres, trending content, and creator discovery.
- The homepage links to standard account functions including sign-up, login, upload, Pro, Premium, terms of use, support, privacy policy, and about information.
- The domain was registered in 2008 and is approximately 18.35 years old.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, 0 abuse reports, and a traffic rank of 2403.

Regulatory Verification Notes

The site's apparent activity is consumer audio streaming and creator services rather than a disclosed regulated financial business. The homepage provides links to terms of use, privacy policy, support, about, developers, and jobs, but the supplied page evidence does not independently verify the operating legal entity or identify a licensing authority. This is a transparency and verification consideration, not evidence of a scam. The available infrastructure and reputation signals are consistent with an established website, while the absence of independent operator verification means on-site branding should not be treated as conclusive proof of legal identity.

EVIDENCE

- The homepage publishes links to Terms of Use, Privacy Policy, Support, About Us, Developers, and Jobs.
- The domain registrar is Cloudflare, Inc.; the domain registration date is 2008-04-11 and the recorded expiry date is 2033-04-11.
- The site is served from AS13335, Cloudflare, Inc., United States.
- Its TLS certificate is issued by YE2 at DV validation level and is valid to 2026-11-05.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the merchant or service operator named in the applicable terms and billing materials, review cancellation and refund conditions for paid plans, and ensure that payment protections are available through the chosen payment method. If a jurisdiction-specific regulated activity is later presented, the relevant licensing or registration should be checked directly with the applicable official registry. Official support and contact channels should also be confirmed through an independent route before resolving account or payment disputes.

EVIDENCE

- The homepage advertises Pro for creators at €8.25 per month when paid annually and Premium for listeners at €6.99 per month.
- The homepage directs users to paid upgrades, account login, support, and terms of use.
- The supplied identity evidence connects the site to three established social domains—Facebook, Twitter, and Instagram—but does not independently verify the real-world operator.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam or impersonation contradictions were identified, but the operator's real-world identity is not independently verified; consequently, legitimacy is strongly indicated rather than proven.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, with traffic delivered through Cloudflare edge addresses and additional potential origin candidates observed. This architecture mitigates direct exposure of the underlying service infrastructure and supports stable delivery, but it is a protective control rather than proof of organizational legitimacy.

Closing Assessment

Ordinary use is proportionate to the available evidence, with independent merchant-identity, subscription, cancellation, and payment-protection checks completed before credential or payment commitments.

Written analysis generated 2026-08-12 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mixcloud.com.

- The request stayed on mixcloud.com. It was not redirected to another domain. CLEAR
- Registration is published under Cloudflare, Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2033-04-11. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mixcloud.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
