

Is miyoshi-bp.com legit? TrustSniffer's high-trust assessment: 100/100

miyoshi-bp.com

Verdict

100

OUT OF 100

HIGH TRUST

miyoshi-bp.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Japanese local auto body and repair shop website (Miyoshi-bp). Contains service listings with example prices, contact phone number, address in Fukuyama, business hours, reservation call-to-action, news/topics and recruitment information.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What miyoshi-bp.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

This website is the online presence of a Japanese local auto-body and vehicle-repair business identified as Miyoshi Body Repair and Paint Industry, presenting repair, painting, vehicle-inspection, maintenance, pricing-estimate, reservation, access, news, and recruitment information for customers in Fukuyama, Hiroshima.

Scam/Impersonation Risk

No contradictions were observed: the site shows no phishing, impersonation, confirmed malicious, or other high-risk abuse pattern. Its content is coherent with a local service business, including repair estimates such as mirror-scratch work from ¥9,000, bumper-scratch work from ¥15,000, dent repair from ¥45,000, bodywork and painting from ¥45,000, and vehicle inspection from ¥18,000. The site also provides a Japanese telephone number, physical address, opening hours, reservation calls to action, service-flow information, business news, and recruitment content. Five abuse reports relate to the shared hosting IP operated by XSERVER Inc., rather than being specifically attributed to this website; this is therefore a soft infrastructure-reputation signal, not evidence of site-level abuse.

EVIDENCE

- The homepage identifies the business as 三吉鋁金塗装工業 and presents local repair services, example prices, reservations, operating hours, and a Fukuyama address.
- Domain registration records show creation on 2009-04-27 and an age of approximately 17.33 years.
- Historical coverage records first seen on 2014-01-03 and last seen on 2026-05-12, spanning 13 years; archival capture is sparse.
- Five abuse reports concern IP address 157.112.152.7 and are attributed to shared XSERVER infrastructure.

Regulatory Verification Notes

The apparent business identity is internally consistent across the available site content, but the operator's real-world identity is not independently verified. The website presents business and contact particulars, including the named company, location, telephone contact, hours, privacy-policy link, and service information; however, no licensing or registration number was identified in the supplied pages. For an ordinary vehicle-repair service, this is a disclosure point for confirmation rather than evidence of a scam. The available reputational context contains no matching broker warning, while the long registration history, reputable registrar, stable business content, and valid transport encryption support the assessment that this is an established, apparently legitimate website.

EVIDENCE

- The domain was registered through GMO Internet Group, Inc. d/b/a Onamae.com and is recorded through 2027-04-27.
- The site is hosted by XSERVER - Xserver Inc., Japan, on AS131965.
- The site's TLS certificate is issued by YR1, uses DV validation, and is valid to 2026-11-10.
- The homepage and linked site navigation provide store information, privacy-policy, service, reservation, and recruitment sections, but no license or registration number is identified in the supplied content.

What to Verify Next

Before credential or payment interactions, an organisation considering engagement should independently confirm that the named business, address, and telephone contact correspond to the intended repair operator, confirm any applicable business authorization through the relevant Japanese or local registry, and review quotation, cancellation, warranty, and payment-protection terms. Contact details should be confirmed through an independent offline or otherwise trusted route rather than relying solely on a newly received message or payment request.

EVIDENCE

- The homepage provides the business address, telephone number, opening hours, and reservation routes needed for independent identity confirmation.
- The service and repair-flow pages provide the basis for comparing quotations, scope of work, and payment expectations.
- The privacy-policy and site-information links provide starting points for reviewing the business's stated handling of customer information and commercial terms.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate local business. No scam or impersonation contradiction was identified, although the operator’s real-world identity remains independently unverified.

Infrastructure Integrity

The site resolves directly to a single likely origin rather than through a detected CDN edge, and no CDN or WAF was detected. This is a neutral hosting characteristic: it does not undermine the site’s legitimacy assessment, but it provides less intermediary-layer protection than a site deployed behind mainstream edge infrastructure.

Closing Assessment

Normal browsing and routine service enquiries are proportionate; before submitting credentials or making a payment, ordinary independent checks of merchant identity, applicable terms, and payment protections should be completed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 5 reports on hosting IP 157.112.152.7 (XSERVER Inc., Data Center/Web Hosting/Transit), 24% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of miyoshi-bp.com.

- The request stayed on miyoshi-bp.com. It was not redirected to another domain. CLEAR
- Registration is published under GMO Internet Group, Inc. d/b/a Onamae.com. CLEAR
- DNS for this domain is served by xserver.jp, across 5 name servers. NOTED
- The registration is paid up to 2027-04-27. NOTED
- The earliest public archive of this site is from 2014-01-03. CLEAR
- It is hosted on XSERVER, from a server in JP. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about miyoshi-bp.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
