

Is mnurlogistics.az a scam? TrustSniffer's high-risk assessment: 0/100

mnurlogistics.az

Verdict

0

OUT OF 100

CRITICAL RISK

mnurlogistics.az shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Assessed 2026-09-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Minimal placeholder page with the visible text 'coming soon.' No links, forms, or identifiable business information present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://mnurlogistics.az/>

What mnurlogistics.az served when TrustSniffer captured it on 2026-09-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Security Alert

Fortinet, Google, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a minimal “coming soon” landing page with no visible products, services, contact details, or identifiable business information, leaving its intended purpose and operating model undetermined.

Scam/Impersonation Risk

The site presents no login form, payment mechanism, wallet connection, or explicit impersonation content, but those limited page-level observations do not offset the materially adverse external reputation evidence. The domain is **blacklisted**, with malicious detections from multiple security services and a confirmed malicious Safe Browsing result. The combination of a very young domain, an almost empty homepage, and convergent external threat detections creates a high risk for sensitive interaction. No distinct legal-entity identity contradiction or on-page brand impersonation was observed; the principal concern is the confirmed external threat classification rather than a demonstrated operator-name conflict.

EVIDENCE

- The homepage displays only “coming soon.” and contains no links, forms, contact details, or identifiable business information.
- External reputation telemetry records 15 malicious detections and 3 suspicious detections from 23 evaluated results; a malicious Safe Browsing match is also recorded.
- The domain was registered in 2026 and is recorded as 0.104 years old, equivalent to 38 days at collection.

Regulatory Verification Notes

The available page does not identify a legal entity, regulated activity, licence, registration number, or governing jurisdiction. This is a substantive disclosure gap, and the operator identity remains unverified; it should not be treated as proof of illegitimacy by itself, but it prevents meaningful regulatory validation. The valid certificate and identifiable hosting arrangement establish transport and infrastructure facts only, not legal standing or authorisation.

EVIDENCE

- The homepage contains no company name, legal notice, licence reference, registration number, terms, or regulatory disclosure.
- The site is hosted on AS52148, ENIXLTD – Enix Ltd, GB.
- The TLS certificate uses issuer YR2, has DV validation, and is valid to 2026-12-15 11:52:31 UTC.

What to Verify Next

No sensitive interaction should occur unless an independently obtained legal entity, operating address, and applicable licence or registration can be confirmed through the relevant official registry. Any future business, support, or payment channel should be validated through an independently sourced route rather than details supplied solely by the site. The domain’s status should also be rechecked before any change from placeholder content to an operational service.

EVIDENCE

- The homepage provides no business identity or contact route against which registry information can be reconciled.
- No licence authority or licence number is presented on the available site content.
- The current page exposes no account, payment, or transaction workflow for independent validation.

Summary Verdict

The overall posture is **critical trust risk** with a sensitive-interaction risk classification. The available evidence does not establish a trustworthy operating identity, while external threat detections provide a decisive adverse signal. The site should not be treated as suitable for credential, account, or financial interaction.

Infrastructure Integrity

The site resolves directly to a single apparent origin and has no detected CDN or WAF layer. This leaves fewer intermediary protections between the hosting environment and the site, although infrastructure configuration alone cannot determine operator intent.

Closing Assessment

Restrict activity to non-interactive observation until the site’s operator, purpose, and regulatory standing are independently established; credentials and financial information should not be submitted.

Written analysis generated 2026-09-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine, external reputation.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mnurlogistics.az.

- The request stayed on mnurlogistics.az. It was not redirected to another domain. CLEAR
- It is hosted on ENIXLTD, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mnurlogistics.az at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
