Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Tubidy is presented as a free browser-based service for searching, streaming, converting, and downloading MP3 music and MP4 videos, with particular emphasis on African music and mobile access; its apparent model is traffic- or advertising-supported media distribution without direct pricing.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent media-download service, with no detected brand impersonation, phishing behavior, credential harvesting, sensitive forms, or confirmed blacklist indication. The absence of direct payment requests and the informational nature of the service further reduce exposure to financial-deception patterns.

- The homepage identifies the service as “Tubidy MP3 & MP4 Download” and provides music and video search, streaming, conversion, and download functions.
- Page analysis recorded no phishing indicators, hidden forms, sensitive forms, or brand-impersonation findings.
- External reputation checks recorded zero malicious and zero suspicious detections, zero abuse reports, and no blacklist hit.

Regulatory Verification Notes

The site operates as a media utility rather than a financial or investment service. Its homepage does not present a licensing claim or direct payment model; the relevant verification issue is therefore limited to confirming the service's content-rights and operating disclosures, not evidence of deceptive conduct. Registration privacy through Domains By Proxy is an administrative detail and does not create an identity contradiction.

- The domain was registered on 2011-02-12 and is approximately 15.48 years old; the registrar is GoDaddy.com, LLC.
- Hosting telemetry records AS13335, Cloudflare, Inc., United States.
- The site's TLS certificate is issued by WE1 at DV validation level and is valid until 2026-10-14.

What to Verify Next

Before institutional adoption, the service's terms should be reviewed for content-rights, takedown, privacy, and acceptable-use provisions. Any material business relationship should also confirm official support channels through an independently sourced route.

- The homepage includes references to download safety, legality, alternatives, and frequently asked questions.
- The homepage displays account, login, playlist, statistics, upload, and media-download functions.
- The stated business model shows no direct pricing or payment mechanism.

Summary Verdict

The website presents as a legitimate, established, trustworthy media service with a coherent purpose and no observed scam or impersonation contradictions. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site is protected by a CDN/WAF layer; all observed addresses were edge servers, and no origin-server address was observable in the analysis. This provides a meaningful defensive layer against direct origin exposure but is a mitigating infrastructure signal rather than proof of legitimacy.

Closing Assessment

Standard use is appropriate, with routine review of the service’s terms and content-rights practices before formal enterprise engagement.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mobi.tubidy.tv.

- The request stayed on mobi.tubidy.tv. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2035-02-12. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mobi.tubidy.tv at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
