- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Mobilemall is an informational mobile-phone price and specification portal for the United States, presenting brand directories, hardware filters, technology articles, country-specific price listings, social links, and advertising opportunities rather than directly processing purchases.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent informational model, with phone listings, specifications, search functionality, and advertising placements; it contains no detected login, credential-harvesting, wallet, phishing, or brand-impersonation indicators. Normal interaction with the site is appropriate.

- The homepage identifies the service as “Mobile Phone Prices in United States (USA)” and lists brands, specifications, and prices.
- The homepage contains one search form and no sensitive submission form or login form.
- Behavioral testing recorded no hidden forms, cloaking, clipboard manipulation, wallet activity, or suspicious scripts.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist hit.

Regulatory Verification Notes

The site operates as an informational and advertising-supported content portal, not as an evident financial or regulated-services provider. No license claim or regulated-service registration is presented in the supplied evidence; this is a limited disclosure point rather than an identity or legitimacy contradiction. Domain registration is administered through Namecheap with privacy-service details, an administrative arrangement that does not undermine the site's established identity.

- The domain was registered on 2021-12-16 and is approximately 4.63 years old.
- Web archives contain 81 snapshots spanning 2021–2026, covering 6 tracked years.
- Registration lists NAMECHEAP INC as registrar, with expiration on 2026-12-16.
- The site is served on AS13335 by Cloudflare; its TLS certificate is issued by WE1 at DV validation level and is valid to 2026-09-17.

What to Verify Next

For commercial reliance, price information should be checked against the relevant manufacturer or retailer before purchase decisions. Advertising partners should confirm campaign terms and official contact channels through independently sourced business records.

- The homepage displays model prices and specifications but does not evidence direct transaction processing.
- The advertising prompt is located on the homepage and identifies a dedicated advertising contact channel.

- Social links on the homepage include Facebook and LinkedIn.

Summary Verdict

Mobilemall presents as a legitimate, established, low-risk informational website with a coherent purpose and no observed scam, phishing, or impersonation indicators. Its overall trust posture supports ordinary browsing, account use where offered, and standard interaction.

Infrastructure Integrity

Cloudflare provides the site’s CDN and WAF protection, with observed traffic terminating at Cloudflare edge infrastructure on AS13335 rather than an exposed origin address. This reduces direct origin exposure and is a mitigating infrastructure signal, not independent proof of legitimacy.

Closing Assessment

Standard use is appropriate, while factual and commercial decisions should remain based on independently corroborated information.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	38%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mobilemall.co.

- The request stayed on mobilemall.co. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-12-16. NOTED
- The earliest public archive of this site is from 2021-12-18. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mobilemall.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
