

Is moe.gov.sa legit? TrustSniffer's high-trust assessment: 90/100

moe.gov.sa

Verdict

90

OUT OF 100

HIGH TRUST

moe.gov.sa appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 75%.

What this site appears to be

Official Saudi Ministry of Education homepage providing informational content, e-services, news, events, and links to education systems and portals. Primarily informational and service-oriented.

Evidence status and limitations

Evidence completeness:

UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What moe.gov.sa served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1999.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is the official Saudi Ministry of Education government portal, presenting education information, electronic services, announcements, statistics, open data, and links to systems serving schools, universities, students, and other public users. Its apparent purpose is public-sector information delivery and government-service access rather than commercial sales, investment solicitation, or payment collection.

Scam/Impersonation Risk

No contradictions were observed: the supplied evidence contains no confirmed phishing, impersonation, blacklist, or malicious-content finding. The homepage presents a coherent Ministry of Education identity and a public-service model, with no login form, sensitive data form, wallet connection, payment solicitation, cryptocurrency content, or deceptive investment claims. A name-similarity signal involving an unrelated lookalike domain was not corroborated by any impersonation or phishing evidence. An external-redirect warning was also observed, but behavioral inspection recorded no external requests, hidden forms, cloaking, wallet activity, clipboard manipulation, or suspicious scripts; it is therefore treated as an uncorroborated browser signal rather than evidence of fraud.

EVIDENCE

- The homepage identifies the portal as a Saudi government education service and provides ministry services, systems, news, statistics, and institutional information.
- Domain continuity evidence records registration in 1999, making the domain approximately 26.72 years old.
- Historical records show 947 archive snapshots across 15 tracked years, from 1999-11-28 through 2013-08-31, with a maximum recorded gap of 1 year.
- External reputation checks recorded zero malicious and zero suspicious detections, no blacklist finding, and no reported abuse activity; the domain is also within the top 1 million by global traffic.

Regulatory Verification Notes

The website's identity presentation is consistent with a sovereign government portal: the homepage describes an official Saudi government service, provides ministry structure and policy sections, and displays a government digital-registration reference. This supports apparent institutional legitimacy, but the real-world operator identity is not independently verified by the supplied evidence and on-page regulatory disclosure is not fully clear. No commercial license or separate financial-services authorization is claimed or established; given the stated public-sector business model, this is a verification point rather than evidence of a scam. No broker-reputation match was identified.

EVIDENCE

- The homepage lists ministry-specific sections including "About the Ministry," organizational structure, leadership, policies, regulations, procurement, services, and applications.
- The homepage states that the portal is registered with the Saudi Digital Government Authority and displays a registration reference.
- The site's transport encryption uses an OV certificate issued by DigiCert Global G2 TLS RSA SHA256 2020 CA1, valid through 2026-11-22.
- The site is served from AS44689, MOHE-AS - Ministry of Education, SA.

What to Verify Next

Before any credential or payment interaction, an organization should independently confirm that the relevant service is linked from an official Saudi government channel and that the applicable service terms, privacy provisions, and payment protections are appropriate. Contact details and support routes should be confirmed through an independent government directory or offline institutional channel rather than relying solely on links encountered during a session.

EVIDENCE

- The homepage provides links to electronic services, ministry applications, service directories, terms, conditions, and policies.
- The captured page contained two forms—a search form and a contact/ticket form—with no sensitive form or untrusted submission destination identified.
- The site presents a government-service model and does not appear to solicit payments or investments.

Summary Verdict

The available evidence is consistent with an established, apparently legitimate government website and supports a high-trust, low-risk posture for its stated informational and public-service purpose. The evidence does not independently prove the real-world operator identity, so normal institutional verification remains appropriate before sensitive account or payment activity.

Infrastructure Integrity

The site resolves to ministry-associated Saudi hosting infrastructure, with no commercial CDN or WAF identified and two likely origin addresses observed. This direct hosting arrangement provides less edge-layer protection than a major CDN deployment, but it is an infrastructure characteristic and does not contradict the site’s otherwise consistent trust assessment.

Closing Assessment

Ordinary browsing and use of the portal’s stated public services are proportionate to the available evidence; any credential or payment step should remain subject to independent confirmation of the service channel, identity, terms, and payment safeguards.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Identity verified on page
- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of moe.gov.sa.

- The request stayed on moe.gov.sa. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 1999-11-28. CLEAR
- It is hosted on MOHE-AS, from a server in SA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about moe.gov.sa at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
