Is mojohost.com legit? TrustSniffer's high-trust assessment: 90/100

mojohost.com

Verdict

HIGH TRUST

mojohost.com appears legitimate.

> Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam | Safe for Login | Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be	Commercial hosting company site offering servers, cloud, CDN and GPU instances. Contains product listings, pricing teasers, contact numbers, support links, news, and legal/footer information. No obvious phishing forms or requests for sensitive credentials in the provided content.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a commercial hosting provider presenting dedicated servers, virtual private servers, cloud infrastructure, GPU instances, CDN services, pricing information, support resources, and related account facilities for subscription-based and usage-based business customers.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing indicators, brand-impersonation findings, conflicting legal identities, or confirmed malicious-reputation results. Behavioral testing did record hidden forms and post-interaction page changes, but the page review found no sensitive form, external password submission, credential-harvesting request, or wallet-related activity; the signal is therefore best treated as an implementation anomaly rather than evidence of a scam. The site's long-running presence, substantial traffic footprint, and continuous historical representation further support an established-site interpretation.

EVIDENCE

- The homepage presents a corporate hosting-provider layout with service listings, contact facilities, support links, and legal/footer navigation; no phishing form or sensitive credential request was identified.
- The site's domain was registered in 2002 and is approximately 23.84 years old.
- Historical records contain 2,224 snapshots spanning 2001–2026, with 26 years tracked.
- The domain has a traffic rank of 1971 and is within the top one million globally; evaluated reputation checks returned zero malicious and zero suspicious results.

Regulatory Verification Notes

The site presents a conventional commercial infrastructure-services model rather than a financial or other clearly regulated offering. Legal and footer links are present, but the supplied content does not show a licensing claim or registration number; this is a disclosure point for ordinary business verification, not evidence of impersonation or fraud. The real-world operator identity remains likely but not independently verified. No third-party broker-reputation match was returned.

EVIDENCE

- Domain registration is through 1API GmbH; the recorded registration date is 2002-10-15 and the expiry date is 2026-10-15.
- The hosting infrastructure is attributed to AS27589, MOJOHOST - MOJOHOST, US.
- The site's transport encryption uses a DV certificate issued by YR1, valid through 2026-10-04.
- The homepage and linked site navigation expose contact, support, news, signup, login, and legal-related areas.

What to Verify Next

Before credential or payment interactions, an enterprise or consumer should independently confirm the legal operating entity, applicable service terms, refund or cancellation provisions, and available payment-protection mechanisms. Contact details should be validated through an independently sourced business channel rather than relying solely on information encountered during the same browsing session. Where a regulated service is being considered, any applicable authorization should be checked with the relevant registry.

EVIDENCE

- The homepage provides a telephone contact route and links to contact and support resources.
- The site navigation includes signup and login pathways alongside service and legal navigation.
- The supplied page content describes paid subscriptions, hourly billing, and ancillary merchant services, making contract and payment terms relevant to onboarding.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. The site does not present observed scam or impersonation contradictions, although the conclusion concerns the website's trust posture and does not independently prove the real-world operator's legal identity.

Infrastructure Integrity

The site resolves directly to infrastructure attributed to AS27589 and MOJOHOST - MOJOHOST, US, with no CDN or WAF detected and one likely origin address identified. This provides clear hosting attribution but less edge-layer shielding than a CDN-backed deployment; it is a contextual infrastructure consideration, not a confirmed threat.

Closing Assessment

Ordinary use may proceed after independent confirmation of the operating entity, service terms, and payment protections before credentials or payment details are submitted.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	40%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mojohost.com.

- The request stayed on mojohost.com. It was not redirected to another domain. CLEAR
- Registration is published under 1API GmbH. CLEAR
- DNS for this domain is served by mojohost.com, across 4 name servers. NOTED
- The registration is paid up to 2026-10-15. NOTED
- The earliest public archive of this site is from 2001-03-31. CLEAR
- It is hosted on MOJOHOST, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mojohost.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a

legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
