Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Molino del Torchio is a local restaurant website presenting a historic water mill in Cuasso al Monte as a venue for Lombard cuisine, tasting menus, events, reservations, and gift vouchers. Its apparent business model is conventional hospitality, with customers paying for dining experiences and related offerings.

Scam/Impersonation Risk

No contradictions were observed. The homepage, restaurant information, menu, events, and contact sections form a coherent local-business presentation, with no observed phishing indicators, login mechanism, sensitive form, deceptive redirect, or suspected brand impersonation. Available external reputation checks returned no malicious or suspicious detections, supporting a low scam and impersonation risk. The evidence is consistent with an established website, although the real-world operator identity is not independently verified.

EVIDENCE

- The homepage identifies Molino del Torchio as a restaurant in a historic mill and describes Lombard cuisine, local ingredients, and Slow Food-related commitments.
- The site's interactive review found no login form, hidden sensitive form, wallet connection, clipboard manipulation, cloaking, or suspicious inline script.
- Domain registration: 2004-12-30T11:01:14Z; age 21.65 years; registrar TUCOWS.COM, CO.

Regulatory Verification Notes

The website presents a hospitality business rather than a financial or otherwise regulated service. No licensing or registration number is presented in the supplied site content; this is a limited commercial-disclosure gap, not evidence of a scam. The operator's legal identity should therefore remain treated as unverified, while the site's substantive business presentation and clean technical and reputational signals are consistent with an established local venue. Registration privacy is an administrative detail rather than a security finding.

EVIDENCE

- The site's navigation includes restaurant, menu, tasting-menu, events, gift-voucher, and contact sections, but no supplied page content states a legal entity name or license number.
- The site's TLS certificate is issued by Actalis Domain Validated TLS Server RSA CA 2025, uses DV validation, and is valid to 2027-02-18T23:51:04+00:00.
- Hosting is on AS31034, ARUBA-ASN - Aruba S.p.A., IT.

What to Verify Next

Before credential or payment interactions, an interested party should independently confirm the venue's legal trading identity, the published address and booking channels, the terms and redemption conditions for any voucher, and the availability of applicable payment protection. For a material commercial engagement, any required local hospitality registration or licensing should be checked with the relevant authority.

EVIDENCE

- The contact section supplies an address, telephone contact, and booking channel for independent confirmation.
- The site describes reservations, events, and gift vouchers as commercial offerings requiring ordinary merchant and payment checks.
- The website responded successfully during two behavioral runs, with two successful runs recorded and no untrusted destination detected.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website operating with a low-risk local-business profile. The high-trust posture is supported by convergence across coherent page content, long registration continuity, valid transport encryption, stable behavior, and clean external reputation, while operator identity remains independently unverified.

Infrastructure Integrity

The site resolves directly to hosting infrastructure rather than a detected CDN edge, with two likely origin addresses and no identified CDN or WAF vendor. Aruba S.p.A. hosting provides a conventional, resolved infrastructure profile; this is a mitigating technical signal, not proof of the operator's legitimacy.

Closing Assessment

Ordinary browsing and routine engagement appear proportionate, subject to independent confirmation of merchant identity, transaction terms, and payment protections before credentials or payments are submitted.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of molinodeltorchio.com.

- The request stayed on molinodeltorchio.com. It was not redirected to another domain. CLEAR
- Registration is published under TUCOWS.COM, CO.. CLEAR
- DNS for this domain is served by technorail.com, across 4 name servers. NOTED
- The registration is paid up to 2026-12-30. NOTED
- The earliest public archive of this site is from 2007-01-26. CLEAR
- It is hosted on ARUBA-ASN, from a server in IT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about molinodeltorchio.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
