

Is moniquejhingon.com safe? TrustSniffer's low-trust assessment: 40/100

moniquejhingon.com

Verdict

40
OUT OF 100

LOW TRUST

moniquejhingon.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-28 by automated analysis. Classification confidence 55%.

What this site appears to be

Marketing and service site for Monique Jhingon offering personalised nutrition and lifestyle consulting, health optimisation programs, a book, blog articles and a newsletter signup. Contains testimonials and service descriptions; primary call-to-action is booking a free consultation.

Compromised host notice

A threat-intelligence feed listed a file on moniquejhingon.com as distributing malware (last seen 2026-09-28). TrustSniffer's evidence indicates that the site itself was compromised: the listing concerns a file placed on it by someone else, and the site's owner is most likely a victim, not the actor.

Until the file is removed, downloading anything from this site is not safe. If you run this site, remove the listed file, update the site software and its plugins, change its passwords and review it for other unauthorized changes.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What moniquejhingon.com served when TrustSniffer captured it on 2026-09-28. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This is a personal health and wellness services website for Monique Jhingon, presenting personalised nutrition and lifestyle coaching, health-optimisation programmes, a microbiome-reset offering, consultations, books, blog content, testimonials, and a newsletter, with a free consultation as its principal visitor call to action.

Scam/Impersonation Risk

Confirmed blacklist status and external threat detections create a material contradiction to the otherwise conventional health-coaching presentation. The homepage and service content do not display obvious phishing mechanics, impersonation indicators, login forms, or financial-interaction features, but those benign page characteristics do not offset the external reputation finding. Two suspicious inline scripts were also observed during technical interaction. The site should therefore be treated as unsuitable for credentials, payments, or other sensitive interactions unless its status is independently resolved. No conflicting legal-entity names, direct brand impersonation, or phishing page indicators were observed. Evidence:

- External reputation telemetry records the domain as blacklisted, with one malicious and two suspicious detections among the evaluated results; one Tier-1 vendor, Fortinet, also flagged it.
- The homepage's rendered content describes nutrition and health coaching and contains no login form, hidden sensitive form, wallet connection, or payment-credential collection flow.
- Browser analysis recorded two suspicious inline scripts, while cloaking was classified as absent and both observed runs completed successfully.
- The domain was registered on 2016-07-05 and is approximately 10.24 years old; historical coverage records 71 snapshots across 11 tracked years, from 2016-12-07 to 2026-08-24.

Regulatory Verification Notes

The site presents a small-business health and wellness model rather than a financial or investment service. Its content attributes more than 12 years of experience, a master's degree in personalised nutrition, and multiple functional-nutrition, lifestyle, diagnostic-testing, nutrigenetics, gut-and-microbiome, and yoga certifications to Monique Jhington; those claims remain site assertions and are not independently verified in the supplied evidence. No professional licence, registration number, or licensing authority is disclosed in the available business content, which is a regulatory-transparency gap rather than, by itself, proof of fraud. The available identity evidence is insufficient to independently connect the website to a verified real-world operator. Evidence:

- The homepage identifies the business as personalised nutrition and health coaching and presents the named practitioner's experience, degree, and certifications.
- The packages and microbiome-reset content describes paid health-optimisation programmes and consultation services.
- The available business content contains no stated licence number, licensing authority, or independently verifiable professional-registration reference.
- The domain is registered through GoDaddy.com, LLC, with the registrant organisation recorded as Domains By Proxy, LLC.

What to Verify Next

Before any paid consultation or health programme is arranged, independently confirm the practitioner's legal business identity and claimed qualifications through an authoritative professional or business record applicable to the relevant jurisdiction. Confirm whether the services require professional registration or other health-practice authorisation, and obtain clear written information on pricing, cancellation, refunds, data handling, and the consultation provider through an independently confirmed contact route. Any external reputation warning should also be resolved with the hosting or security provider before sensitive use proceeds. Evidence:

- The site's principal action is booking a free consultation, making independent confirmation of the provider's identity and qualifications the first practical control.

- The site offers paid programmes and book sales, making written commercial terms and payment-protection arrangements material before purchase.
- The site includes a newsletter signup but no sensitive form in the observed page capture; any later request for health or identity information should be assessed separately before submission.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The website presents a coherent health-coaching proposition and contains no visible identity conflict, but the confirmed external reputation contradiction and unresolved operator identity prevent a positive legitimacy conclusion.

Infrastructure Integrity

The site resolves to infrastructure operated by Oracle Corporation in the United States, with no CDN or WAF identified and no separate edge/origin arrangement observed. Transport encryption is provided by a RapidSSL TLS RSA CA G1 domain-validated certificate, valid through 2027-01-28; this confirms encrypted transport but is only a limited technical-control signal and does not establish operator legitimacy. Evidence:

- Hosted on AS31898, ORACLE-BMC-31898 — Oracle Corporation, US.
- TLS certificate issued by RapidSSL TLS RSA CA G1, validation level DV, valid to 2027-01-28.
- Infrastructure resolution identified one IP and no detected CDN, edge-IP layer, or origin-candidate separation.

Closing Assessment

Prospective users should restrict activity to non-sensitive review until the external reputation finding, operator identity, qualifications, and applicable regulatory status have been independently confirmed.

Written analysis generated 2026-09-28 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- The page carried inline scripts written in a style TrustSniffer treats as suspicious.

Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of moniquejhingon.com.

- The request stayed on moniquejhingon.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by bluehost.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-05. NOTED
- The earliest public archive of this site is from 2016-12-07. CLEAR
- It is hosted on ORACLE-BMC-31898, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about moniquejhingon.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
