

Is monitoramentoescudo.com.br a scam? TrustSniffer's high-risk assessment: 0/100

monitoramentoescudo.com.br

Verdict

0

OUT OF 100

CRITICAL RISK

monitoramentoescudo.com.br shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 75%.

What this site appears to be

Portuguese-language website for 'Monitoramento Escudo', a security and facilities services provider offering monitoring, alarm services, cleaning, maintenance and staffing. Includes company description, service list, testimonials and contact information (phone and email). No forms or payment solicitations detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://monitoramentoescudo.com.br/>

What monitoramentoescudo.com.br served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2017.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This Portuguese-language website presents Monitoramento Escudo as a local security and facilities-services provider for residences, condominiums, commercial premises, and companies, offering monitoring, alarms, cleaning, maintenance, and staffed operational support through contracted services.

Scam/Impersonation Risk

The site's visible content is consistent with a conventional local-services business: it contains service descriptions, company information, testimonials, contact details, and no login form, payment solicitation, cryptocurrency feature, or overt deceptive financial claim. However, that benign presentation is outweighed by confirmed external threat detections and blacklisting, including detections associated with Fortinet and Sophos. No direct brand impersonation, conflicting legal identities, or phishing form was observed, but the confirmed

reputation contradiction is sufficient to make credential submission, financial interaction, and other sensitive activity inappropriate. Two abuse reports also concern the observed IP address; these are attributed to shared CDN infrastructure, carry zero confidence, and are specifically discounted as infrastructure-level reports rather than evidence conclusively attributable to this website.

EVIDENCE

- External reputation checks recorded 12 malicious detections, with Fortinet and Sophos among the flagged vendors; the domain was also recorded as blacklisted.
- The homepage contains business-service content and contact information but no login form, sensitive form, payment solicitation, or wallet-connection mechanism.
- Domain registration: 2015-08-07; approximately 11.04 years old, with expiry on 2028-08-07.
- Web archives contain 428 snapshots spanning 2017-06-11 to 2026-02-21, covering 10 tracked years.

Regulatory Verification Notes

The website describes itself as operating in accordance with applicable legislation and promotes qualified personnel and continuous service, but the available content does not provide a licensing authority, registration number, or independently verifiable regulatory credential. The real-world operator identity remains unverified; the registration record names “M P de Andrade Comercio de Serv Eletronic ME,” without evidence establishing that this entity is the operator represented by the website. This is a regulatory and identity-verification gap, not independent proof of fraud. A valid transport certificate and established registration history support technical continuity, but neither establishes licensing or operator identity.

EVIDENCE

- The site’s “Quem Somos” content states that its procedures comply with legislation and that personnel are qualified, but no license authority or license number is presented.
- The registration record identifies the registrant as “M P de Andrade Comercio de Serv Eletronic ME”; independent linkage to the website operator is unverified.
- Served on AS209242 through CLOUDFLARESPECTRUM - Cloudflare London, LLC, US.
- TLS certificate issued by WR1 at DV validation level, valid to 2026-11-04.

What to Verify Next

Before any sensitive engagement, an independent check should confirm the operating entity against the relevant Brazilian corporate and, where applicable, private-security licensing registries. Contracting parties should validate the company’s legal name, service authorization, insurance and contractual terms through independently sourced records rather than relying solely on the website. Contact channels should also be confirmed through an offline or independently published route, and any request for credentials, remote access, advance payment, or sensitive documentation should be withheld until those checks are complete.

EVIDENCE

- The website's company-description content provides operational claims but does not independently establish the legal or regulatory status of the provider.
- The site offers monitoring, facilities, and staffing services under a contract-based business model, making legal-entity and authorization checks material before procurement.
- The observed page behavior was stable across 2 successful runs, with no hidden forms, cloaking, clipboard activity, or wallet-drainer behavior detected.

Summary Verdict

The overall posture is **critical trust with elevated sensitive-interaction risk**. The site appears professionally presented and technically functional, but the confirmed external threat detections and blacklisting prevent the available evidence from supporting safe trust in the website for sensitive activity or a verified conclusion about its real-world operator.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present and provides a mitigating layer against direct exposure, but all observed addressing was associated with CDN edge infrastructure and the origin server was not observable in this analysis. This infrastructure arrangement can support service continuity, but it does not establish legitimacy or offset the external reputation findings.

Closing Assessment

The appropriate institutional posture is to suspend login, credential, financial, and sensitive-document interactions with the website until independent entity, authorization, and channel checks are completed and the external threat status is resolved.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 2 reports on hosting IP 103.169.142.0 (Canva Pty Ltd t/a Canva, Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of monitoramentoescudo.com.br.

- The request stayed on monitoramentoescudo.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by dns.br, across 2 name servers. NOTED
- The registration is paid up to 2028-08-07. CLEAR
- The earliest public archive of this site is from 2017-06-11. CLEAR
- It is hosted on CLOUDFLARESPECTRUM, from a server in AU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about monitoramentoescudo.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
