

Is montessorinttc.com a scam? TrustSniffer's high-risk assessment: 0/100

montessorinttc.com

Verdict

0

OUT OF 100

CRITICAL RISK

montessorinttc.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Marketing/landing site for DITTI, a Montessori and pre-primary teacher training institute in Kochi offering diploma and PG diploma courses, placement assistance, and course details.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What montessorinttc.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a marketing and enrollment site for DITTI, presented as a Montessori and pre-primary teacher-training institute in Kochi. It promotes diploma and postgraduate diploma courses, educator-focused training, placement assistance, and registration for prospective students, with course fees and related training services appearing to be the underlying business model.

Scam/Impersonation Risk

The site presents a coherent educational purpose and the homepage contains no observed login form, credential-harvesting mechanism, or explicit brand-impersonation indicator. However, this benign presentation is outweighed by confirmed external threat detections and blacklist status associated with the domain. The decisive concern is therefore not the apparent education business model itself, but the contradiction between the site's professional-looking content and its adverse external reputation. The homepage also makes material claims—including more than 20 years of experience, an AIESAC award, worldwide recognition, student

placements in the USA, UK, and Gulf region, and 100% placement assistance—that are not independently established by the supplied evidence.

EVIDENCE

- The homepage identifies DITTI as a Montessori and pre-primary teacher-training provider and advertises a Diploma in Montessori and a P.G. Diploma in Pre-primary Education.
- External reputation checks recorded 7 malicious and 1 suspicious detections from 13 evaluations; blacklist status was recorded as true.
- Domain registration telemetry records creation on 2010-02-23 and an age of 16.5 years.
- Archive records show a first-seen date of 2013-03-27, a last-seen date of 2025-07-12, and 13 years tracked.

Regulatory Verification Notes

The available site content describes training services but does not establish a verified licensing, accreditation, or regulatory status. No license authority or license number is supplied in the evidence, and the site's legal identity could not be independently connected to a verified real-world operator. The absence of a broker-dataset match is only contextual and does not constitute approval or regulatory validation. The site's transport security is technically present, but a domain-validated certificate confirms encrypted communication rather than institutional legitimacy.

EVIDENCE

- The homepage and About content identify the operator as “Daphne’s International Teachers’ Training Institute (DITTI)” and describe its courses and placement services.
- No licensing authority or license number is disclosed in the supplied course, About, or contact content.
- Hosting telemetry identifies AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- The site's TLS certificate is issued by WE1 at DV validation level and is valid to 2026-10-31.

What to Verify Next

Before any enrollment, payment, or submission of personal information, an independent party should confirm that the named institute exists at its stated location and that its course-awarding and placement claims can be substantiated through independently sourced institutional contacts. Any accreditation or authorization should be checked directly with the relevant issuing body, while fee, refund, certificate, and placement terms should be obtained in writing. Payment should use a method providing dispute or chargeback protection, and official contact channels should be confirmed through an independent, offline route.

EVIDENCE

- The site provides “Register Now” and “Enrol Now” calls to action for prospective students.
- Automated interaction testing completed 2 successful runs, recorded 16 console errors, and observed a maximum post-interaction DOM difference of 2,885.
- Network telemetry recorded 15 external XHR requests and 12 external POST requests; no non-whitelisted external XHR destinations were recorded.
- No password forms, hidden forms, wallet connections, clipboard-hijacking activity, or credential-sensitive forms were detected.

Summary Verdict

The overall posture is **critical trust risk**, with sensitive interactions unsuitable for routine reliance. The website's apparent educational purpose does not resolve the confirmed external contradiction, and the real-world operator identity remains unverified.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and all observed addresses were CDN edge infrastructure rather than an identified origin server. This provides a mitigating layer against direct origin exposure but is not evidence that the underlying operator or content is legitimate.

Closing Assessment

The appropriate institutional position is to suspend enrollment, payment, and personal-data submission until the institute, its authorizations, and its commercial terms have been independently confirmed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of montessorinttc.com.

- The request stayed on montessorinttc.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-23. NOTED
- The earliest public archive of this site is from 2013-03-27. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about montessorinttc.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
