Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Moovers.mx is a Spanish-language Mexican ecommerce website presenting electric bicycles, scooters, and motorcycles for direct sale, supported by product listings, pricing, showroom information, accessories, workshop services, and customer-contact pages.

Scam/Impersonation Risk

The site's retail presentation is coherent and its homepage does not show a login form, credential-harvesting mechanism, wallet connection, or other direct phishing behavior. However, this benign page presentation is outweighed by a confirmed external blacklist hit, which constitutes a material contradiction and supports a high-risk posture for sensitive interactions. The available evidence does not establish brand impersonation or conflicting legal identities, but the blacklist finding means that the apparent storefront should not be treated as sufficient evidence of a safe merchant relationship.

EVIDENCE

- The homepage presents Moovers-branded electric bicycles, scooters, and motorcycles with “Add to cart” functionality and retail navigation.
- Historical records for the domain show 58 snapshots across 8 years, with records dated from 2019-02-07 through 2026-05-21.
- The domain was registered on 2018-12-13 and is approximately 7.69 years old.
- External reputation monitoring records a confirmed blacklist hit associated with the domain.

Regulatory Verification Notes

The site appears to describe a conventional retail business rather than a regulated financial service, and its identity pages provide business and contact information. Nevertheless, the available pages do not present a licensing or registration number, leaving the legal seller identity and applicable consumer-protection obligations requiring independent confirmation. This is a regulatory-transparency gap rather than, by itself, proof of fraud. The apparent identity connection is therefore plausible but not independently verified, and the confirmed external reputation issue remains the more significant risk consideration.

EVIDENCE

- The Contact and business-information content provides a Guadalajara physical address, telephone details, and links to social-media profiles.
- The available business pages do not display a license, registration number, or named licensing authority.
- The site is hosted on AS16276, identified as OVH - OVH SAS, FR.
- Transport encryption uses a DV certificate issued by YR1, valid until 2026-11-09.

What to Verify Next

Before any purchase or disclosure of personal or payment information, an independent registry search should confirm the legal seller name, operating status, and connection to the Guadalajara address. Payment should be limited to a method offering strong dispute and chargeback protections, with invoice, warranty, delivery, and return terms retained before funds are sent. Official contact channels and showroom details should also be confirmed through an independently obtained source rather than relying solely on information presented by the site.

EVIDENCE

- The site's retail pages identify direct product sales, showroom visits, and after-sales service as the stated operating model.
- The Contact and business-information pages provide the details that require independent cross-checking.
- The available content includes product pricing and shopping-cart functionality, creating a potential payment exposure if the merchant relationship is not independently validated.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The website is coherent as an ecommerce storefront, but the confirmed external blacklist finding prevents the available content and technical continuity from supporting a trustworthy engagement conclusion. Identity appears plausible rather than proven.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, and the observed address is an edge address rather than an independently visible origin. This reduces direct exposure of the origin infrastructure but is only a mitigating technical control and does not resolve the reputation contradiction. The observed hosting provider is OVH - OVH SAS, FR.

EVIDENCE

- Observed edge address: 51.81.168.249 on AS16276.
- CDN/WAF protection is present; no origin candidate was identified.
- The resolved infrastructure is associated with the United States while the hosting organization is identified as OVH - OVH SAS, FR.

Closing Assessment

Sensitive actions should be deferred until the merchant identity, payment protections, and independently sourced contact details have been confirmed; read-only browsing is the proportionate interim use.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The structure of the page changed sharply while it was loading.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of moovers.mx.

- The request stayed on moovers.mx. It was not redirected to another domain. CLEAR
- Registration is published under Registrar.eu. CLEAR
- DNS for this domain is served by dnsdan.com, across 2 name servers. NOTED
- The registration is paid up to 2026-12-13. NOTED
- The earliest public archive of this site is from 2019-02-07. CLEAR
- It is hosted on OVH, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about moovers.mx at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
