

Is morettini.com legit? TrustSniffer's high-trust assessment: 100/100

morettini.com

Verdict

100

OUT OF 100

HIGH TRUST

morettini.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Official site of Oleificio Toscano Morettini (est. 1950). Presents company information, product catalog of extra virgin olive oils (DOP/IGP/Bio), production/process details, museum and tour offerings, contact details, and legal/policy pages. Contains cookie consent and newsletter signup. No financial investment or credential-harvesting indicators.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What morettini.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website presents itself as the official online presence of Morettini Oleificio Toscano, an established Italian producer and seller of extra virgin olive oils and related gastronomic products. Its apparent business model combines direct ecommerce, DOP/IGP/Bio product sales, B2B private-label services, and visitor experiences involving a museum and tours.

Scam/Impersonation Risk

No contradictions were observed. The site content is consistent with a conventional corporate and ecommerce operation: it describes the company, production processes, products, visitor experiences, contact arrangements, and legal or policy pages, without phishing, impersonation, credential-harvesting, cryptocurrency, or other abuse indicators. External reputation checks recorded no malicious or suspicious findings and no confirmed blacklist or phishing signal. The available evidence therefore supports an apparently legitimate, established website, although the real-world operator identity is not independently verified.

EVIDENCE

- The homepage and company pages identify Morettini Oleificio Toscano, describe an olive-oil production business, and link to company, product, contact, experience, shop, and policy content.
- The domain was registered on 2000-02-28 and is approximately 26.49 years old.
- Archive records show first observation on 2001-03-31 and last observation on 2026-02-12, with 26 years tracked and no suspicious repurposing detected.

Regulatory Verification Notes

The site operates as a food-product producer and ecommerce merchant rather than presenting a regulated financial service. Its pages provide company, product, contact, privacy, cookie, and other policy information, but the supplied content does not identify a regulatory licence or registration number; this is a disclosure point for ordinary merchant verification, not evidence of a scam. The company identity presented on the site is consistent with the technical registration organization, while independent real-world operator verification remains incomplete. A broker-reputation cross-check produced no match, which provides limited contextual reassurance but is not a legal or licensing determination.

EVIDENCE

- The site's company, product, contact, shop, experience, and legal/policy pages describe direct sales, private-label services, and visitor offerings rather than financial intermediation.
- The hosting infrastructure resolves to AS60798, ASSERVEREASY - Servereasy Srl, IT.
- The site uses a valid DV TLS certificate issued by YR1, valid until 2026-10-12T18:11:42+00:00.

What to Verify Next

Before credential or payment interactions, an acquiring institution or prospective customer should independently confirm the merchant identity, review the applicable returns and transaction terms, and ensure that payment protection is available through the selected payment method. Any business engagement should also confirm the official support and contact channels through an independent route rather than relying solely on a web form or newsletter pathway.

EVIDENCE

- The shop and policy pages establish the relevant purchase, returns, privacy, and payment-information review points.
- The contact page and linked Facebook, Instagram, and LinkedIn profiles provide channels for independent business confirmation.
- The site uses cookie-consent and newsletter forms, with no login form or sensitive credential form detected.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk corporate ecommerce website. The high-trust posture is supported by convergent site-content, domain-continuity, technical-security,

behavioral, and external-reputation signals, while the operator’s real-world identity remains likely rather than independently verified.

Infrastructure Integrity

The site is protected by a CDN/WAF layer, which provides a useful mitigating control against direct exposure and routine automated abuse. Observed routing includes CDN edge infrastructure and a separate potential origin candidate; this arrangement is not proof of legitimacy but is technically consistent with a professionally operated web service.

EVIDENCE

- CDN/WAF protection was observed, with four edge IPs associated with AS14618 and one likely origin candidate.
- The site resolved successfully and exhibited stable HTTP behavior during testing, with no cloaking, hidden forms, wallet-drainer activity, or suspicious inline scripts detected.

Closing Assessment

Normal browsing and ordinary ecommerce consideration are proportionate to the available evidence, subject to the independent merchant-identity, returns, and payment-protection checks described above before submitting credentials or payment details.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of morettini.com.

- The request stayed on morettini.com. It was not redirected to another domain. CLEAR
- Registration is published under Hosting Concepts B.V. d/b/a Registrar.eu. CLEAR
- DNS for this domain is served by tecnosw.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-28. NOTED
- The earliest public archive of this site is from 2001-03-31. CLEAR
- It is hosted on ASSERVEREASY, from a server in IT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about morettini.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
