What motelchevalier.com.br served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2010.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

What appears to be a Portuguese-language local hospitality website for Motel Chevalier in Lages, Santa Catarina, Brazil, presenting short-stay suites, amenities, promotions, location details, operating hours, and reservation prompts as a direct-booking motel business.

Scam/Impersonation Risk

The principal risk is a confirmed external blacklist result accompanied by malicious and suspicious detections, creating a material contradiction with the site's otherwise ordinary motel presentation. The available page content describes suites, private garages, hydro facilities, sauna, Wi-Fi, and telephone-based reservations, and does not show a login form, hidden sensitive form, wallet connection, or obvious brand impersonation. Nevertheless, the external threat signals and observed browser activity—including unusual network activity, substantial post-interaction DOM changes, and console errors—warrant a security-forward posture for credentials, payments, or other sensitive interactions. No separate identity contradiction between legal entities was observed.

EVIDENCE

- External reputation telemetry records a confirmed blacklist hit, with 2 malicious and 1 suspicious detections among 3 evaluated detections.
- Browser testing recorded 14 external XHR requests, 10 external POST requests, a maximum external-activity ratio of 74.6%, 758 maximum DOM differences after interaction, and 8 console errors; no hidden forms or wallet-drainer activity was detected.
- The homepage presents Motel Chevalier as a local motel with suite descriptions, amenities, contact details, and reservation prompts, while the page analysis recorded no phishing or impersonation indicators.
- Registration telemetry records creation on 2023-03-16, approximately 3.43 years of domain age, while archive records show 78 snapshots spanning 2010–2026 across 17 tracked years; this provenance discrepancy should not be treated as resolved.

Regulatory Verification Notes

The site's apparent business model is conventional hospitality rather than a financial or investment service. Available content provides operational and location information, but does not state a corporate registration number, hospitality authorization, or other formal licensing detail; this is a transparency and verification gap, not by itself evidence of fraud. The real-world operator remains unverified, and the domain's external reputation issue should be treated separately from the site's on-page business description.

EVIDENCE

- The available site content identifies the business as Motel Chevalier and describes short-stay accommodation, amenities, promotions, and direct reservation activity.
- No license, registration number, or formal regulatory authorization is stated in the available legal or business-disclosure content.
- Hosting resolves through AS270797, Brasil Cloud Servicos de Computacao em Nuvem Ltda, Brazil.
- The site uses a domain-validated TLS certificate issued by YE2, valid through 2026-11-14.

What to Verify Next

An independent local-business or corporate-registry check should confirm that Motel Chevalier operates at the stated premises and that the published reservation contact belongs to that business. Before payment, the booking channel should provide the merchant identity, cancellation terms, refund conditions, and a payment method with appropriate dispute protection. Enterprise security teams should also reconcile the external reputation status independently before permitting credential or payment workflows involving the domain.

EVIDENCE

- The homepage and contact content provide the business name, location, operating information, and telephone-based reservation route for independent comparison.
- The booking model relies on direct reservations and ancillary accommodation services rather than a documented regulated-service framework.
- The site's available interaction flow does not expose a sensitive web form, so independent confirmation of the booking and payment channel is particularly important.

Summary Verdict

The overall posture is **low trust**, with elevated risk concentrated on sensitive interactions. Although the site presents a coherent local-business proposition and contains no clear on-page phishing mechanics, the external contradiction is sufficiently material that apparent legitimacy cannot be treated as established.

Infrastructure Integrity

The site resolves directly to a single hosting address associated with Brasil Cloud Servicos de Computacao em Nuvem Ltda, with no CDN or WAF edge identified. This provides a clear hosting path but limited intermediary protection; infrastructure characteristics do not offset the external reputation risk.

EVIDENCE

- The resolved address is 177.131.140.93 in Brazil.
- Infrastructure telemetry identifies 1 unique IP, 0 CDN edge IPs, and 1 likely origin IP.

Closing Assessment

Sensitive actions should remain restricted until the operator, booking terms, payment recipient, and external reputation status have been independently confirmed through trusted channels.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of motelchevalier.com.br.

- The request stayed on motelchevalier.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by dns.br, across 2 name servers. NOTED
- The registration is paid up to 2027-03-16. NOTED
- The earliest public archive of this site is from 2010-03-24. CLEAR
- It is hosted on AS270797, from a server in BR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about motelchevalier.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
