- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Moteur.ma is a Moroccan automotive marketplace and editorial portal presenting new and used vehicle catalogs, price information, promotions, comparisons, classifieds, seller services, and automotive news; its apparent business model is to connect buyers and sellers while monetizing listings, advertising, and promotional placements.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing, impersonation, malicious-content, or conflicting-identity indicators. The homepage presents a coherent automotive marketplace rather than a deceptive financial or investment proposition, with vehicle catalogs, pricing, promotions, comparisons, classifieds, and editorial coverage consistent with the stated business model. The site's long registration history and clean external reputation further support an established-site interpretation, although the real-world operator identity remains independently unverified.

EVIDENCE

- Domain registration record: registered 2015-07-23T15:15:04Z, approximately 11.06 years old.
- Homepage: vehicle catalogs, used-car listings, price comparisons, promotions, and automotive news are presented under the Moteur.ma identity.
- External reputation checks: 0 malicious detections, 0 suspicious detections, no malicious safe-browsing result, and 0 abuse reports were recorded for the assessed domain or infrastructure.

Regulatory Verification Notes

The available material supports an apparently legitimate automotive classified and comparison service, not a site presenting itself as a regulated financial institution. No license or registration number is claimed in the supplied business-profile evidence; for this type of intermediary marketplace, that is a transparency item to clarify rather than evidence of fraud. Legal and contact pointers are indicated in the site presentation, but the operator's connection to a separately verified real-world entity has not been established. The domain is registered through ARCANES TECHNOLOGIES, which is a concrete registration detail but not, by itself, proof of the operator's legal identity.

EVIDENCE

- Domain registration record: registrar ARCANES TECHNOLOGIES; registrant field MOTEUR.MA.
- Site presentation: the homepage identifies the service as a Moroccan new- and used-vehicle portal and includes account, seller-service, contact, and legal-navigation elements.
- Transport security: TLS certificate issued by WE1, validation level DV, valid to 2026-09-21.

What to Verify Next

Before credential or payment interactions, independently confirm the legal entity associated with the site through an applicable corporate or commercial registry, and review the terms governing listings, advertising, seller representations, complaints, and any returns or refunds. For a vehicle purchase, independently validate the seller, vehicle documentation, ownership, condition, and payment destination; use payment methods offering appropriate protection and confirm official contact channels through an independent route.

EVIDENCE

- Account interface: login and registration functions are present on the site.
- Seller-service areas: the site provides “sell your vehicle,” professional showroom, rental-vehicle, and listing-related functions requiring clarification of the respective contracting parties.
- Business-model evidence: the platform is described as an intermediary that does not take custody of buyer-seller transactions.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a low overall risk posture and no observed scam or impersonation contradictions. The classification is strong, while independent confirmation of the real-world operator remains incomplete.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, a mitigating control that reduces direct exposure of the hosting environment; observed addresses were CDN edge addresses and no origin server address was identified in the analysis.

EVIDENCE

- Hosting telemetry: served from AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- Network posture: 6 observed IP addresses were CDN edges, with 0 likely origin IP candidates.
- CDN edge examples: 104.26.8.67, 104.26.9.67, and 172.67.70.89 on AS13335.

Closing Assessment

Normal browsing and marketplace use are proportionate to the assessed posture, with ordinary independent checks of merchant identity, transaction terms, and payment protection completed before credentials or funds are committed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about moteur.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
