

Is mpo1000.net a scam? TrustSniffer's high-risk assessment: 4/100

mpo1000.net

Verdict

4

OUT OF 100

CRITICAL RISK

mpo1000.net shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Online casino landing/navigation page listing slots, live casino, sportsbook, and payment methods; contains registration/login links and contact chat links but no visible licensing or verifiable operator details in the provided content.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What mpo1000.net served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is an online gambling platform branded MPO1000, presenting slots, live casino, sportsbook, arcade games, poker, togel, jackpot titles, registration and login functions, and payment options including bank transfer, mobile credit, and electronic money. Its apparent business model is to receive player deposits and generate revenue through wagers.

Scam/Impersonation Risk

No confirmed phishing, impersonation, blacklist, or conflicting-identity signal was observed, and the available external reputation checks did not identify malicious or suspicious findings. However, the site's own commercial mechanics create substantial sensitive-interaction risk: service access is preceded by deposits, the value flow associated with payments and wagers is not clearly explained, and the site provides limited evidence for high-stakes accountability. The absence of a contradiction does not establish that the real-world operator has been independently verified.

EVIDENCE

- Homepage content presents registration, login, wagering categories, and payment methods before any clearly documented service or settlement framework.
- Homepage content contains the red-flag conditions of deposit-before-service, opaque value flow, and a high-stakes evidence gap.
- The domain registration record shows registration on 2022-11-23 and an age of 3.75 years.

Regulatory Verification Notes

The site presents a gambling operation but the supplied homepage content does not display a licensing authority, licence number, or verifiable operator identity. This is a material regulatory-transparency gap for a platform accepting deposits and wagers, although it is not by itself evidence of impersonation or fraud. The available page-authority and external context provide limited support for public establishment, while the site's identity remains unverified; ordinary gambling legality, consumer protection, and payment-recovery assumptions should therefore not be made.

EVIDENCE

- Homepage footer and navigation identify the MPO1000 brand and an "18+" restriction but do not show a licensing authority or licence number.
- Homepage content lists gambling services and payment channels without a visible corporate operator disclosure or verifiable regulatory details.
- Hosting infrastructure is identified as AS22612, NAMECHEAP-NET - Namecheap, Inc., US.
- The site's TLS certificate is issued by Sectigo Public Server Authentication CA DV R36, uses DV validation, and is valid to 2026-11-30.

What to Verify Next

Before any funded interaction, an independent check should confirm the operator's legal name and the relevant gambling licence directly with the applicable regulatory registry. Payment terms should be reviewed for deposit, withdrawal, dispute, identity-check, and account-closure conditions, with confirmation that the proposed payment method provides meaningful recovery or chargeback protections. Official support and contact channels should also be confirmed through an independent route rather than relying solely on links presented on the site.

EVIDENCE

- The homepage provides login, registration, live-chat, WhatsApp, and Telegram contact paths but no independently verifiable operator details in the supplied content.
- The site's payment presentation includes bank transfer, mobile credit, and electronic-money methods, making withdrawal and dispute terms important to establish before funding.
- The available content identifies the business as an online casino and sportsbook rather than a conventional goods or services merchant.

Summary Verdict

The overall posture is **critical trust risk** for sensitive interaction. The site has a functioning and coherent gambling presentation, but the combination of unverified operator identity, limited regulatory disclosure, and deposit-dependent financial mechanics does not support trust for account, credential, or monetary activity.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and observed addresses are Cloudflare edge servers; the origin server was not observable in this analysis. This provides a mitigating layer against direct infrastructure exposure, but it is a protective hosting characteristic rather than evidence that the operator or business is legitimate.

Closing Assessment

The appropriate business posture is to avoid funded or credentialed engagement unless the operator, licence, withdrawal terms, and payment protections have been independently validated.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mpo1000.net.

- The request stayed on mpo1000.net. It was not redirected to another domain. CLEAR
- Registration is published under NameSilo, LLC. CLEAR
- DNS for this domain is served by spaceship.net, across 2 name servers. NOTED
- The registration is paid up to 2026-11-23. NOTED

- The earliest public archive of this site is from 2023-01-26. CLEAR
- It is hosted on NAMECHEAP-NET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mpo1000.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
