

Is mprfoods.com safe? TrustSniffer's low-trust assessment: 40/100

mprfoods.com

Verdict

40

OUT OF 100

LOW TRUST

mprfoods.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

MPR Foods ecommerce homepage listing product categories (Naach, Mpr Fresh Foods, Nutreeherb, Mpr Diet Foods), contact details, testimonials, checkout/cart and bulk order inquiry. Standard regional online shop for packaged food products.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What mprfoods.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2017.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

MPR Foods is a regional online food retailer presenting packaged snacks, fresh foods, herbal products, nuts, and diet-food items through branded product categories, with direct ordering, cart and checkout functionality, bulk-order inquiries, delivery claims, and customer-support contact details.

Scam/Impersonation Risk

The site presents a coherent food-e-commerce model and no page-level brand-impersonation or product-fraud indicators were identified. However, this benign presentation is outweighed by confirmed external threat detections and blacklist listings, creating a material contradiction for sensitive use. Browser testing also detected a hidden form and substantial page-structure changes after interaction, including on a site that provides login, registration, cart, and checkout functions; these behaviors warrant treating credential and payment interactions as exposed. No conflicting legal identities or direct evidence of impersonation was observed.

EVIDENCE

- The homepage identifies MPR Foods and displays Naach, Mpr Fresh Foods, Nutreeherb, and Mpr Diet Foods product categories, together with cart, checkout, login, and registration functions.
- Browser interaction recorded 1 hidden form in 1 run, 4,131 DOM mutations, and a maximum post-interaction DOM difference of 4,131 across 2 successful runs.
- External reputation checks recorded 3 malicious classifications and 1 suspicious classification, alongside confirmed blacklist detections.
- Historical records show 74 archive snapshots spanning 2017–2026, with 10 years tracked; this continuity does not neutralize the current external threat signals.

Regulatory Verification Notes

The available material supports an established domain and a functioning commercial website, but it does not independently verify the real-world operator. The site does not present a license claim, licensing authority, or registration number; for a packaged-food retailer, this is a disclosure and verification gap rather than proof of a scam. Domain registration is through GoDaddy.com, LLC, and the site uses a valid domain-validated TLS certificate issued by YR2. These technical and registration signals support operational continuity, but they do not resolve the confirmed reputation contradiction or establish legal ownership.

EVIDENCE

- The domain was registered on 2015-09-02 and is approximately 10.97 years old; the registrar is GoDaddy.com, LLC.
- The website is served through AS26496, identified as AS-26496-GO-DADDY-COM-LLC, GoDaddy.com, LLC, United States.
- The site's TLS certificate is DV-validated, issued by YR2, and valid until 2026-10-31.
- The homepage and supporting commercial content provide product, contact, delivery, and bulk-order information, but no license authority or license number is identified in the supplied disclosures.

What to Verify Next

Before any sensitive interaction, an institution should independently confirm the operating entity, physical business details, and applicable food-commerce registrations through authoritative records rather than relying solely on the website. Contact channels should be validated through an independently sourced telephone number or business record, and any order should use a payment method with enforceable buyer protection. The login and checkout flow should not be used until the confirmed external detections and the observed interaction behavior have been resolved.

EVIDENCE

- The site includes About Us, Services, Contact, and Community pages that can be assessed for a legal entity, address, ownership statement, and customer-service commitments.
- The homepage provides a telephone contact, an email contact, delivery claims, and a bulk-order inquiry route suitable for independent call-back validation.
- The product and cart pages form the relevant transaction surface for checking item descriptions, refund terms, delivery obligations, and payment protections.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The site's credible commercial presentation and established technical continuity are insufficient to offset the confirmed external reputation contradiction and the unresolved identity connection. Normal browsing may be possible, but the evidence does not support treating login, credential, or payment activity as trusted.

Infrastructure Integrity

The website is protected by CDN/WAF infrastructure, with observed edge service on GoDaddy-associated hosting and additional potential origin candidates. This provides a mitigating layer against some infrastructure exposure, but protective hosting controls are not evidence that the operator or transaction flow is legitimate.

Closing Assessment

Prospective users should refrain from submitting credentials or making financial transactions until the external detections are resolved and the operator, applicable registrations, contact channels, and payment protections have been independently confirmed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, page content.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page contained a form a visitor cannot see.
Behaviour in a sandbox rule:BEHAV_HIDDEN_FORMS
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- The page asks visitors for sensitive information.
Page content rule:PAGE_FORM_SENSITIVE
- The page replaced a large part of its own content after loading.
Behaviour in a sandbox rule:BEHAV_DOM_CHANGE_HIGH

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mprfoods.com.

- The request stayed on mprfoods.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)
- DNS for this domain is served by mprfoods.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2032-09-02. [CLEAR](#)
- The earliest public archive of this site is from 2017-08-02. [CLEAR](#)
- It is hosted on AS-26496-GO-DADDY-COM-LLC, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mprfoods.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
