

Is mtservices.online safe? TrustSniffer's moderate-trust assessment: 65/100

mtservices.online

Verdict

65
OUT OF 100

MODERATE TRUST

mtservices.online is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Business site for MTS 24HR Mobile Roadside (MT Services LLC) offering 24/7 mobile diesel repair and fleet maintenance in Kenosha and surrounding areas, with phone, email, service descriptions, and a service request form.

Evidence status and limitations

Evidence completeness: **UNKNOWN**

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What mtservices.online served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Governance Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2025.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

MTS 24HR Mobile Roadside is a local service website for MT Services LLC, presenting 24/7 mobile diesel repair, emergency roadside assistance, fleet maintenance, and on-site support for commercial trucks, trailers, RVs, and heavy equipment in Kenosha, Wisconsin and surrounding areas.

Scam/Impersonation Risk

No blacklist, phishing, malware, or confirmed impersonation contradiction was observed. The homepage presents a coherent local-service model with service descriptions, dispatch information, and a service-request form, while observed behavior showed no login capture, hidden forms, cloaking, wallet interaction, or suspicious script activity. A limited automated similarity signal referenced “service.gov.uk,” but it was not supported by the site's local automotive-repair content and does not establish impersonation. Reports associated with the serving IP were attributed to shared Cloudflare infrastructure, were confidence-zero, and were therefore not treated as site-specific abuse. The principal concern is not an active scam indicator but the need to establish the real-world operator before sensitive or high-value engagement.

EVIDENCE

- Homepage content identifies MTS 24HR Mobile Roadside and MT Services LLC and describes mobile diesel repair, fleet maintenance, emergency dispatch, and service-area coverage.
- The homepage contains one service-request contact form; testing found no login form, hidden form, password submission, wallet connection, clipboard manipulation, or cloaking.
- External infrastructure record: 5 abuse reports were associated with 162.159.140.166, identified as a whitelisted Cloudflare CDN IP with confidence score 0 and shared-infrastructure attribution.
- Registration record: created 2026-05-17T18:42:45Z, approximately 0.26 years old; registrar listed as HOSTINGER operations, UAB.
- Web-archive record: 2 snapshots in 2025, covering 1 year tracked.

Regulatory Verification Notes

The site appears to operate as a commercial vehicle-repair service rather than a financial or investment business. Its business presentation is specific about paid emergency calls, scheduled maintenance, and fleet-related services, and no contradictory legal-entity names were observed. No licensing claim or license number is presented in the supplied site content; for this type of local repair service, that is a transparency point requiring confirmation rather than evidence of fraud. The available evidence is consistent with a genuine local service website, but the operator's real-world identity remains unverified. The external broker-reputation dataset contained no match.

EVIDENCE

- The homepage title and body identify “MTS 24HR Mobile Roadside,” state Kenosha, WI as the base, and describe repair services for semi-trucks, trailers, heavy equipment, and RVs.
- Hosting telemetry: served from AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- Transport telemetry: TLS certificate issued by WE1 at DV validation level, valid to 2026-10-16T06:40:45+00:00.
- The supplied page content contains no license authority or license number.

What to Verify Next

Before entering into a material service contract or making a substantial advance payment, independently confirm that MT Services LLC is the operating business associated with the service area and published contact channels. Obtain a written estimate or dispatch agreement covering rates, parts, cancellation terms, warranty treatment, and payment timing. For fleet or recurring-maintenance arrangements, validate references or business documentation through an independent channel rather than relying solely on the website.

EVIDENCE

- The homepage offers emergency dispatch, scheduled maintenance, fleet services, and a service-request workflow, supporting verification of the intended commercial relationship.
- The FAQ and service-area content provide additional business details that can be compared with independently obtained information.
- The contact and request-service pages provide the channels through which operator and pricing details can be confirmed before engagement.

Summary Verdict

The website presents a coherent, apparently legitimate local automotive-repair operation with no observed scam or impersonation contradictions. Its overall posture is **moderate trust**: suitable for ordinary service-information review, while independent operator and transaction checks remain appropriate before sensitive or high-value engagement.

Infrastructure Integrity

Cloudflare CDN/WAF protection and edge-served addressing provide a standard mitigating layer against direct origin exposure, but this infrastructure is not proof of business legitimacy. The analysis observed Cloudflare edge infrastructure only, with no origin candidate identified.

Closing Assessment

Proceed on a verify-before-commit basis, using independently confirmed business details and documented commercial terms before substantial payment or ongoing contractual engagement.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

Signals weighed against the site

- AbuseIPDB: 5 reports on hosting IP 162.159.140.166 (Cloudflare, Inc., Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mtservices.online.

- The request stayed on mtservices.online. It was not redirected to another domain. CLEAR
- Registration is published under HOSTINGER operations, UAB. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-17. NOTED
- The earliest public archive of this site is from 2025-02-22. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mtservices.online at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
