Full analysis

Overview

Mubawab.ma is a public-facing Moroccan real-estate marketplace presenting property listings for sale, rent, new developments, and holiday accommodation, with multilingual navigation, property search, and tools for publishing advertisements; its apparent business model is marketplace listing, advertising, and lead generation.

Scam/Impersonation Risk

No contradictions were observed. The available content is consistent with an established property marketplace and does not show phishing, brand impersonation, malicious redirection, credential-harvesting forms, wallet activity, or other abuse mechanisms. Automated interaction generated some external requests and page changes, but the observed behavior also showed no hidden forms, cloaking, clipboard manipulation, or sensitive wallet functionality; this does not establish a fraud pattern. External reputation checks were clean, and the site had an established global traffic presence.

EVIDENCE

- The homepage presents property search and advertisement-publishing functions for Moroccan real estate, with no visible payment or credential-harvesting mechanism.
- Behavioral testing recorded no hidden forms, password submissions to external destinations, wallet connections, wallet-drainer activity, or cloaking.
- The domain was registered on 2010-08-19 and is approximately 15.99 years old.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist hit; the site's traffic rank was 76380.

Regulatory Verification Notes

The site's apparent activity is online real-estate intermediation rather than a regulated financial service. The supplied page content does not show a licensing authority or registration number, so regulatory authorization and the legal basis for any brokerage, advertising, or lead-generation activity remain verification points rather than established facts. The registration record identifies Mubawab SL, but the real-world operator identity is not independently verified; this is an identity-validation limitation, not an observed identity contradiction. No separate adverse broker-reputation match was identified.

EVIDENCE

- The homepage identifies the service as a Moroccan property marketplace and offers sale, rental, new-development, and advertisement-listing categories.
- The supplied content contains no visible license authority or license number.
- The domain registrar is MTDS; the registration record names Mubawab SL.
- The site is served from AS16509, Amazon.com, Inc. (Amazon-02), US.
- Transport encryption uses a DV certificate issued by Amazon RSA 2048 M04, valid through 2027-01-12.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm that Mubawab SL is the authorized operator, establish the identity and authority of any property advertiser, and confirm applicable consumer, brokerage, and advertising requirements with the relevant Moroccan registry or authority. Payment arrangements should use documented, protected channels, with transaction terms and any applicable cancellation or dispute process reviewed independently of the listing itself.

EVIDENCE

- The homepage supports user sign-in and advertisement publication, making operator and advertiser identity checks relevant before account or transaction activity.
- The supplied content does not provide a licensing authority or registration number for independent regulatory confirmation.
- The site offers contact and lead-generation functionality, so communications and payment instructions should be validated through independently sourced channels.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for ordinary interaction. No scam, phishing, impersonation, or identity-contradiction indicators were observed, although the site's real-world operator identity remains independently unverified.

Infrastructure Integrity

The website is protected by AWS CDN/WAF infrastructure, and the observed addresses were CDN edge addresses rather than identifiable origin candidates. This reduces direct origin exposure and is a positive defensive signal, but protective infrastructure alone is not proof of the operator's legitimacy.

Closing Assessment

Normal browsing and routine marketplace use are proportionate to the observed risk posture, while independent identity, transaction, and payment-protection checks should precede material commitments.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mubawab.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
