- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2006.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Muebles Holiday is a Peruvian furniture manufacturer and online shop presenting educational and corporate furniture, including chairs, tables, desks, and related school and workplace products, with catalogue pricing, ordering conditions, warranty information, and sales contact through the website, WhatsApp, and email.

Scam/Impersonation Risk

No contradictions were observed across the available site, technical, behavioral, and reputation evidence. The homepage presents a coherent furniture-commerce model rather than a phishing or credential-harvesting workflow: no login form, hidden sensitive form, wallet connection, cloaking, or brand-impersonation indicator was identified. Available external checks found no malicious or suspicious detections, no abuse reports, and no confirmed threat listing. The domain’s long registration continuity and consistent historical presence further support an established-site interpretation, although the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage identifies Muebles Holiday and presents a structured catalogue of educational and corporate furniture.
- Site behavior recorded two successful runs, with no cloaking, hidden forms, password-external forms, wallet activity, clipboard hijacking, or suspicious inline scripts.
- Domain registration: registered 2004 (~22.46 years old).
- Web archives: 143 snapshots spanning 2006–2026 (21 years tracked).

Regulatory Verification Notes

The site appears to operate as a conventional furniture manufacturer and retailer, with product specifications, prices in Peruvian soles, minimum-order conditions, a 50% advance requirement, stated delivery timing, warranty information, and contact channels. The available content does not present a license, license number, or independently verifiable legal-entity registration; for this type of commercial seller, that is a transparency and verification matter rather than evidence of impersonation or fraud. The available third-party broker context produced no name match, and the overall evidence remains consistent with an established, apparently legitimate commercial website.

EVIDENCE

- The homepage and product pages describe furniture manufacturing and sales for educational and corporate customers in Peru.
- The order and warranty content sets out minimum quantities, 50% advance payment, delivery within 30 business days, and post-sale terms.
- Hosting: AS23352, SERVERCENTRAL - DEFT.COM, US.
- TLS certificate: issued by YR2, DV validation, valid to 2026-10-06T09:22:44+00:00.

What to Verify Next

Before a material commercial transaction, independently confirm the seller's legal business identity using an authoritative Peruvian business or tax registry, obtain a written quotation and warranty terms, and confirm that the payment beneficiary matches the verified merchant. For credential or payment interactions, use independently confirmed contact channels and payment methods that provide appropriate transaction protection.

EVIDENCE

- The homepage provides the commercial name and product catalogue to support independent seller-identity checks.
- The product and order pages provide the transaction conditions that should be matched against the written quotation.
- The contact and warranty pages provide the channels and after-sales terms to validate through an independent route.
- The checkout or payment instructions should be checked for consistency with the verified merchant identity and applicable payment protections.

Summary Verdict

The overall posture is high trust and low risk, with evidence consistent with an established, apparently legitimate website and no observed scam, phishing, impersonation, or identity-conflict indicators. The classification supports ordinary site interaction, while the operator’s real-world identity remains likely rather than independently proven.

Infrastructure Integrity

The site resolves to a single identifiable hosting location on SERVERCENTRAL - DEFT.COM in the United States, using AS23352, with no CDN detected and one likely origin address. The infrastructure is stable and technically identifiable, but hosting architecture alone is a mitigating technical signal rather than proof of merchant legitimacy.

Closing Assessment

Normal browsing is appropriate, but independent merchant-identity, return-policy, and payment-protection checks should be completed before credentials or payment details are submitted.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	40%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mueblesholiday.com.

- The request stayed on mueblesholiday.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by banahosting.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-11. NOTED
- The earliest public archive of this site is from 2006-11-07. CLEAR
- It is hosted on SERVERCENTRAL, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mueblesholiday.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
