

Is mufle.com legit? TrustSniffer's high-trust assessment: 100/100

mufle.com

Verdict

100

OUT OF 100

HIGH TRUST

mufle.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Corporate website for MufleSystem, presenting drainage channel products, use cases, downloadable brochures/datasheets and contact information (headquarters, phone, email). Includes privacy/cookie consent messaging.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1999.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

MufleSystem is a corporate product website for wastewater and rainwater drainage solutions, presenting HD-PE drainage channels, application information, downloadable brochures and datasheets, and headquarters and contact details for commercial inquiries. Its apparent business model is the manufacture and sale of drainage products to commercial and infrastructure customers.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent industrial-manufacturer profile, including drainage channels for houses and gardens, roads and public spaces, logistics and transport, and main infrastructure, together with identifiable MUFLE product ranges and technical documentation. The site does not present a login flow, sensitive form, cryptocurrency functionality, investment offer, or other observed mechanism commonly associated with credential theft or payment abuse. Available external reputation checks recorded no malicious, suspicious, phishing, impersonation, or abuse indicators. The website appears legitimate and established on the available evidence, although the real-world operator identity has not been independently verified.

EVIDENCE

- Domain registration records show creation on 1999-03-18 and an age of 27.44 years.
- Historical records show first observation on 1999-11-28, last observation on 2026-01-24, and 28 years tracked.
- The homepage was classified as a corporate/product page with no sensitive forms, hidden forms, wallet connections, or suspicious scripts observed.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, no search-warning detection, no external blocklist hit, and 0 abuse reports.

Regulatory Verification Notes

The site provides company-oriented content, headquarters information, telephone and email contact channels, product documentation, and privacy/cookie messaging. The supplied pages do not show a licensing claim or license number; for a drainage-system manufacturer, this is a disclosure and verification item rather than evidence of a scam. Technical registration information lists COREhub, S.R.L. as registrar and associates the registration with ACO Ahlmann SE & Co. KG, but that record does not independently prove that the website is operated by that entity. The available evidence is therefore consistent with an established corporate website while leaving operator identity independently unverified.

EVIDENCE

- Domain registrar: COREhub, S.R.L.; recorded registrant organization: ACO Ahlmann SE & Co. KG.
- The site is served from AS8648, ONE-NETWORK - dogado GmbH, DE.
- The transport certificate uses YR2 as issuer, provides DV validation, and is valid to 2026-10-23T16:56:38+00:00.
- The homepage and contact area provide product, headquarters, and commercial-contact information; no license number is displayed in the supplied content.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the merchant identity through the relevant corporate registry, confirm any product or market-specific certifications applicable to the intended procurement, and review contractual, delivery, warranty, and return terms. Payment arrangements should use established protections appropriate to the transaction, and contact channels should be confirmed through an independent route before material commercial commitments.

EVIDENCE

- The homepage identifies the business purpose as water-management and drainage-product manufacturing.
- Product brochures, datasheets, and declarations of performance are available through the download area for procurement review.
- The contact section identifies headquarters and regional contact pathways suitable for independent confirmation.

Summary Verdict

The overall posture is high trust and low risk, with the available evidence consistent with an established, apparently legitimate website. This conclusion supports ordinary business interaction but does not constitute independent proof of the real-world operator’s identity.

Infrastructure Integrity

The site benefits from CDN/WAF protection, which is a mitigating control against direct exposure and some routine web abuse. Infrastructure records identify Hetzner Online GmbH in Germany on AS24940, with observed edge infrastructure and potential origin candidates; this protective architecture supports resilience but is not, by itself, proof of legitimacy.

Closing Assessment

Ordinary engagement is proportionate to the assessed posture, subject to independent confirmation of merchant identity, applicable certifications, commercial terms, payment protections, and official contact channels before sensitive or financially material actions.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mufle.com.

- The request stayed on mufle.com. It was not redirected to another domain. CLEAR
- Registration is published under COREhub, S.R.L.. CLEAR
- DNS for this domain is served by lemarit.de, across 5 name servers. NOTED
- The registration is paid up to 2027-03-18. NOTED
- The earliest public archive of this site is from 1999-11-28. CLEAR
- It is hosted on ONE-NETWORK, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mufle.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
