Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

MultiChain is an enterprise blockchain software platform presenting tools for rapidly deploying customizable blockchains and applications, with an apparent business model centered on organizational adoption, support, and commercial software licensing.

Scam/Impersonation Risk

No contradictions were observed across the available identity, content, behavioral, and reputation signals. The homepage presents a coherent corporate software proposition rather than a deposit-taking, investment-return, or consumer-payment scheme; it contains no login form, hidden sensitive form, wallet-draining behavior, brand-impersonation indicators, or phishing signals. The domain also has an established operating history and a clean external threat-reputation profile, supporting confidence that the site is genuine.

EVIDENCE

- Homepage: professional enterprise software presentation with legal navigation, product navigation, and no phishing or impersonation indicators.
- Homepage behavior: no login form, hidden form, wallet connection, clipboard manipulation, suspicious scripts, or cloaking detected.
- Domain registration: Registered 2012 (~13.99 years old).
- Web archive: 348 snapshots spanning 2004–2026 (23 years tracked).

Regulatory Verification Notes

The site identifies the operator in its footer as Coin Sciences Ltd and provides About, Terms, Privacy, and Contact pages. Its stated activities concern enterprise blockchain software, including rapid blockchain deployment, asset and token issuance, data streams, permissions, multisignature security, and optional proof-of-work; the homepage also claims development-time reductions of up to 80%. No financial-services license or registration number is presented in the supplied page content, which is a limited disclosure point rather than evidence of misconduct. The available third-party broker context contains no matching warning.

EVIDENCE

- Homepage: identifies “MultiChain” as an enterprise blockchain platform and displays “MultiChain © 2026 Coin Sciences Ltd.”
- Homepage: advertises rapid deployment, unlimited assets, data streams, fine-grained permissions, multisignatures, cold nodes, and admin-by-consensus security.
- Hosting infrastructure: Served from AS14061 (DigitalOcean, LLC, US).
- TLS certificate: Issued by Sectigo Public Server Authentication CA DV R36, validation level DV, valid to 2026-12-29.

What to Verify Next

For enterprise procurement, independently confirm Coin Sciences Ltd as the contracting entity, review the Terms and Privacy pages, and obtain any sector-specific licensing or contractual assurances applicable to the intended deployment. Standard account login and normal platform interaction are appropriate within the organization’s ordinary access-control and vendor-onboarding procedures.

EVIDENCE

- Footer: links to About Us, Terms, Privacy, and Contact Us pages.
- Homepage: provides a single email-newsletter form without a sensitive-data submission field.
- Business description: presents enterprise software adoption and support rather than deposits, investment returns, or consumer payments.

Summary Verdict

The site presents as a legitimate, established, and trustworthy enterprise software provider with no observed scam, phishing, impersonation, or identity-conflict indicators. Its coherent product presentation, sustained historical presence, clean reputation, and stable technical operation support normal interaction, including account login and standard use.

Infrastructure Integrity

The site uses CDN/WAF protection, with observed traffic associated with AS14061 and DigitalOcean, LLC; the origin server was not observable in this analysis. This protective edge architecture mitigates direct origin exposure but is appropriately treated as a supporting control rather than proof of legitimacy.

Closing Assessment

The site is suitable for normal business evaluation and use, with standard enterprise procurement, access-control, and contractual review applied to any material engagement.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of multichain.com.

- The request stayed on multichain.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by digitalocean.com, across 3 name servers. NOTED
- The registration is paid up to 2029-08-08. CLEAR
- The earliest public archive of this site is from 2004-05-19. CLEAR
- It is hosted on DIGITALOCEAN-ASN, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about multichain.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
