

Is multilatinomarketing.com a scam? TrustSniffer's high-risk assessment: 0/100

multilatinomarketing.com

Verdict

0

OUT OF 100

CRITICAL RISK

multilatinomarketing.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Multi Latino Marketing Agency, Inc. — Chicago-based multicultural marketing agency showcasing services, clients (Verizon, Coca-Cola, Comcast, etc.), certifications, contact details and news. Typical corporate site for a local agency.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What multilatinomarketing.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Multi Latino Marketing Agency, Inc.'s website presents a Chicago-based multicultural marketing and advertising agency offering multimedia campaigns, branding activation, consulting, case studies, corporate-client work, news, careers, and contact information. Its apparent business model is conventional business-to-business marketing services funded through client contracts, campaign fees, and related consulting engagements.

Scam/Impersonation Risk

The site's visible content is consistent with a corporate marketing agency and does not display a login form, payment workflow, cryptocurrency functionality, or other obvious phishing mechanics. However, this benign presentation is outweighed by confirmed external threat detections and blacklist status: the domain received multiple malicious classifications, including 11 malicious and 1 suspicious detection, and is listed by two external blacklist sources. The available evidence does not establish a brand-impersonation or conflicting-identity case, but the reputation findings create a material risk for sensitive interaction and should be treated as the decisive security concern.

EVIDENCE

- The homepage identifies Multi Latino Marketing Agency, Inc. and describes multicultural marketing services, corporate campaigns, and client work.
- The homepage contains no login form, hidden sensitive form, wallet connection, or password-submission workflow.
- External reputation telemetry recorded 11 malicious detections and 1 suspicious detection; the domain was also marked as blacklisted.
- The domain was registered in 2012 and is approximately 14.4 years old; historical coverage records 60 archive snapshots spanning 2012–2026, with 15 years tracked.

Regulatory Verification Notes

The Company, services, Success, News, Careers, and Contact pages provide a coherent agency profile and identify named clients including Coca-Cola, Comcast, Illinois Lottery, Northwestern Memorial Hospital, Verizon Wireless, and other organizations. The site references WMBE/MBE certifications, but the supplied evidence does not show a license number, licensing authority, or independent verification of those certifications. Identity linkage is assessed as likely rather than verified, so the on-page company presentation should not be treated as conclusive proof of the real-world operator. A separate broker-reputation dataset produced no name match and therefore adds no adverse broker-specific signal.

EVIDENCE

- The Company page names “Multi Latino Marketing Agency, Inc.” and describes the business as Chicago based and serving the Midwest.
- The Success and case-study material lists corporate and community clients, including Coca-Cola, Comcast, Verizon Wireless, and Northwestern Memorial Hospital.
- The site’s content map identifies WMBE/MBE certifications, while the supplied business record shows no claimed or verified license authority or license number.
- The domain’s TLS certificate is issued by YR1, uses Domain Validation (DV), and is valid through 2026-09-30.

What to Verify Next

Before any sensitive engagement, an independent party should confirm that the named company is currently registered at the relevant corporate registry, validate the stated WMBE/MBE certifications with the issuing bodies, and confirm the business relationship with a named client through an independently sourced corporate contact. Contact details should be validated through an offline or independently obtained channel, and any device or browser warning associated with the domain should be escalated to the organization’s security team rather than bypassed.

EVIDENCE

- The Company and Contact pages provide the stated business identity and contact route for independent comparison.
- The certifications are presented on the agency site but are not independently verified in the supplied evidence.
- Browser testing completed 2 successful runs, with no hidden forms, password-external forms, clipboard manipulation, or wallet-drainer activity observed.
- The site returned stable HTTP 200 responses during testing, but external threat detections remained present.

Summary Verdict

The overall posture is **critical trust risk**. Although the website presents a coherent, conventional agency profile and contains no obvious on-page phishing workflow, the confirmed external malicious detections and blacklist status materially undermine confidence in safe sensitive interaction. Identity linkage remains likely but not independently verified.

Infrastructure Integrity

The site is served from AS31898, identified as ORACLE-BMC-31898 / Oracle Corporation in the United States, with one resolved IP and no detected CDN edge IPs. This infrastructure provides a concrete hosting attribution, but hosting stability and transport encryption do not offset the domain's adverse reputation. The site's transport encryption is DV TLS issued by YR1 and valid through 2026-09-30.

Closing Assessment

Sensitive actions such as account authentication, credential submission, financial transactions, or downloading files should be withheld unless the independent identity, certification, and security checks above produce satisfactory results.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- A large share of what the page loaded came from other domains.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_MODERATE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
--------	--------

Identity score	79/100
----------------	--------

Identity verification confidence	39%
----------------------------------	-----

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of multilatinomarketing.com.

- The request stayed on multilatinomarketing.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)
- DNS for this domain is served by domaincontrol.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-03-29. [NOTED](#)
- The earliest public archive of this site is from 2012-06-15. [CLEAR](#)
- It is hosted on ORACLE-BMC-31898, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about multilatinomarketing.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
