

Is mundocap.com safe? TrustSniffer's low-trust assessment: 50/100

mundocap.com

Verdict

50

OUT OF 100

LOW TRUST

mundocap.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Personal/agency website and blog for Carlos Andrés Pérez Noguera (mundocap) featuring articles, portfolio items, biography and links to social profiles. Contains a site login area but primarily serves editorial and portfolio content.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://mundocap.com/

What mundocap.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Mundocap is a personal and creative-agency website for Carlos Andrés Pérez Noguera, presenting audiovisual portfolios, articles, biographical material, and links to social profiles; its apparent business model is editorial publication and indirect promotion of creative or agency services rather than direct financial activity.

Scam/Impersonation Risk

No page-level brand impersonation or identity inconsistency was observed, and the site's content is consistent with a personal blog and audiovisual portfolio. However, the site is associated with three external malicious detections and a confirmed blacklist status across external sources. That reputation signal is materially inconsistent with the otherwise benign editorial presentation and creates elevated risk for account authentication and other sensitive interactions. The homepage also exposes a sign-in function, while observed browsing behavior included suspicious inline scripts and substantial DOM changes after interaction. No wallet connection, hidden sensitive form, or confirmed phishing page was observed. The domain's long registration history and historical presence provide provenance context but do not neutralize the current security contradiction.

EVIDENCE

- External reputation checks recorded 3 malicious detections and confirmed blacklist status across 2 external sources.
- The homepage contains a sign-in form; behavioral testing recorded 6 suspicious inline scripts and a maximum post-interaction DOM difference of 1602.
- Domain registration: 2011-10-29 (~14.82 years old), registered through NAMECHEAP INC.
- Historical records contain 88 archive snapshots spanning 2013–2026 (14 years tracked).

Regulatory Verification Notes

The homepage, biography material, and portfolio content present an apparent personal or creative-agency identity, but the available evidence does not independently verify the real-world operator. No regulated financial product or licensing claim is presented; accordingly, the principal regulatory issue is the absence of a basis in the site content for treating it as a regulated service. The site's valid transport encryption and identifiable hosting arrangement are technical controls, not evidence of licensing or legal authorization.

EVIDENCE

- The site presents personal, editorial, and audiovisual portfolio material and does not state a license number or regulated-service authorization.
- Hosted on AS22612 (NAMECHEAP-NET - Namecheap, Inc., US); TLS certificate issued by Sectigo Public Server Authentication CA DV R36 at DV validation level, valid to 2027-03-29.

What to Verify Next

Before any account or sensitive interaction, an independent source should confirm that the domain is the intended official site for the named individual or agency. The sign-in function should be validated through an independently obtained contact channel, and any applicable business, professional, or sector-specific registration should be checked directly with the relevant registry rather than relying on statements made on the site. Existing accounts should not reuse passwords until the domain's security status has been resolved.

EVIDENCE

- The homepage provides the authentication entry point that requires independent confirmation before use.
- The biography and portfolio material provide the identity and agency context to compare against independently sourced records.
- The site's social-profile links provide potential channels for cross-checking official presence, but linkage alone does not establish operator identity.

Summary Verdict

Mundocap has a low-trust posture and should be treated as elevated risk for sensitive interactions. Its apparent personal and creative purpose is not sufficient to overcome the confirmed external security contradictions, and the available evidence supports non-sensitive browsing only pending independent resolution.

Infrastructure Integrity

The site resolves to a single direct origin, with no CDN or WAF vendor detected and no edge-IP layer identified. This infrastructure posture offers limited protective mitigation, so the site's technical presentation should not be interpreted as assurance of legitimacy.

Closing Assessment

Prospective users should limit activity to non-sensitive browsing and withhold credentials or financial information until the site's identity and security status have been independently confirmed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - The page carried inline scripts written in a style TrustSniffer treats as suspicious.
Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS
 - The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
 - The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	40%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mundocap.com.

- The request stayed on mundocap.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by namecheaphosting.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-29. NOTED
- The earliest public archive of this site is from 2013-06-14. CLEAR
- It is hosted on NAMECHEAP-NET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mundocap.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
