Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

MXstore is an Australian online retailer for motocross and dirt-bike gear, parts, accessories, protective equipment, tyres, tools, apparel, and lifestyle products, operating through an extensive ecommerce catalog with shipping, click-and-collect, showroom, and customer-support services.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation indicators, or confirmed malicious reputation findings were observed. The homepage presents a coherent retail business model, established product categories, customer-service information, and normal ecommerce functionality; its claims of being “Australia’s #1” and having “1,200,000 customers” are marketing assertions but do not create an identity conflict.

- The homepage identifies MXstore as a motocross and motorcycle retailer with a large catalog and established-brand inventory.
- The domain is approximately 16.9 years old, with the first recorded archive appearance in 2009.
- The site’s historical record contains 397 snapshots across 18 tracked years, from 2009 through 2026.

Regulatory Verification Notes

The site provides commercial identity and customer-service disclosures, including a physical Gold Coast address and an Australian Business Number. The reviewed material describes ordinary product retail rather than a regulated financial service, and no financial-services license claim is presented. Registration records identify Web Address Registration Pty Ltd as registrar and Jake Alberts as the recorded owner; these are administrative identity details, not adverse findings. Available external reputation checks found no malicious or suspicious detections, and no broker-dataset match was present.

- The homepage and support content provide a Gold Coast physical address, ABN, telephone contact, shipping information, and returns policies.
- Registered through Web Address Registration Pty Ltd, with Jake Alberts recorded as owner.
- Hosted on AS16509 (AMAZON-02 - Amazon.com, Inc., US).
- TLS certificate issued by YR2 at DV validation level, valid to 2026-10-17.

What to Verify Next

For a prospective commercial relationship, confirm the ABN and trading details through the relevant Australian business registry, and independently confirm any material order, refund, or warranty terms through the site’s

published customer-service channels. Standard ecommerce interaction, including account login and ordinary purchasing, is appropriate.

- The homepage exposes product pricing, catalog categories, and established-brand inventory.
- Customer-support pages provide contact, shipping, click-and-collect, showroom, and returns information.
- The site offers ordinary retail services rather than investment, lending, or other regulated financial products.

Summary Verdict

MXstore presents as a legitimate, established, and trustworthy ecommerce business with a coherent identity, sustained historical presence, clean reputation signals, and no observed contradiction. Its overall posture supports normal interaction and standard account or purchasing activity.

Infrastructure Integrity

AWS CDN/WAF protection was observed, with the available address representing an edge endpoint and no origin candidate identified. This reduces direct origin exposure and is a positive defensive measure, while remaining a mitigating infrastructure signal rather than proof of legitimacy.

- Protected by AWS CDN/WAF infrastructure.
- One observed IP was classified as an edge address.
- No origin-server candidate was identified in the infrastructure analysis.

Closing Assessment

Normal browsing, account login, and standard purchasing may proceed; higher-value commercial activity should follow the organization’s ordinary supplier and transaction controls.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mxstore.com.au.

- The request stayed on mxstore.com.au. It was not redirected to another domain. CLEAR
- Registration is published under Web Address Registration Pty Ltd. CLEAR
- DNS for this domain is served by awsdns-33.org, across 4 name servers. NOTED

- The earliest public archive of this site is from 2009-08-30. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mxstore.com.au at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
