Full analysis

Overview

The website is the online presence of MXT Brazilian Jiu Jitsu Saint John, a local martial-arts gym presenting class schedules, instructor information, memberships, paid bookings, contact details, and signup functionality. Its apparent business model is the provision of instructor-led Brazilian Jiu Jitsu training and related member services.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or conflicting-identity signals were observed. The homepage presents a coherent local-business identity, named instructors, class information, and contact details, while the available reputation checks found no malicious or suspicious detections and no matching third-party broker warning. The real-world operator is not independently verified, so the evidence supports an apparently legitimate established site rather than proving the identity of the person or organization behind it.

EVIDENCE

- The homepage identifies MXT Brazilian Jiu Jitsu Saint John and presents instructor, schedule, contact, and location information without detected impersonation indicators.
- The domain was registered on 2017-06-30 through Wix.com Ltd. and is 9.15 years old.
- Web-archive records show 566 snapshots spanning 2017–2026, with 10 years tracked and no suspicious repurposing identified.
- External screening recorded 0 malicious detections, 0 suspicious detections, 0 abuse reports, and no blacklist or phishing match; coverage was partial because one provider was unevaluated.

Regulatory Verification Notes

The site presents a conventional local fitness-service model rather than claiming to provide a regulated financial service. Available content does not state a licensing authority or license number, and the operator's legal identity is not independently verified; these are verification and disclosure considerations, not evidence of a scam. The site uses standard domain-validated transport encryption and identifiable hosting infrastructure, which supports technical continuity but does not establish regulatory status.

EVIDENCE

- The homepage and membership-related content describe local martial-arts instruction, class bookings, and membership services; no license authority or license number is presented.
- The site is served from AS63949 (AKAMAI-LINODE-AP - Akamai Connected Cloud, SG).
- The TLS certificate is issued by YR1 at DV validation level and is valid to 2026-10-01T08:13:41+00:00.
- The available third-party broker dataset returned no matching entity.

What to Verify Next

Before credential or payment interactions, independently confirm the gym's legal operating name, physical presence, cancellation or refund terms, and the payment protections applicable to any membership or booking. Contact channels should also be confirmed through an independent route, particularly where a transaction or recurring membership is involved.

EVIDENCE

- The homepage includes signup, booking, and payment interfaces, creating a need to confirm the merchant identity and applicable transaction terms before use.
- The site provides contact and address information that can be checked independently against the local business presence.
- The operator identity remains unverified by independent evidence, making merchant-identity confirmation the principal outstanding check.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence consistent with an established, apparently legitimate local business. The assessment supports normal website use in principle, while the

absence of independent operator-identity verification means legitimacy should not be treated as conclusively proven.

Infrastructure Integrity

The website is protected by Akamai CDN/WAF infrastructure, and the observed address belongs to the CDN edge rather than an identified origin server. This materially reduces direct exposure of the hosting environment and is a mitigating technical signal, but protective infrastructure alone is not proof of legitimacy.

Closing Assessment

Ordinary use is proportionate, provided that independent merchant-identity, policy, and payment-protection checks are completed before credentials or payment details are submitted.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mxtbjj.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
