Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Майшоп is an established Russian online retailer presenting books, educational materials, foreign-language literature, toys, stationery, gifts, discounts, ordering, delivery, payment, returns, seller information, and customer support through a conventional ecommerce catalog.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand impersonation, or confirmed blacklist findings were observed. The homepage presents a coherent retail model with conventional catalog and account functionality, while external reputation checks recorded no malicious or suspicious detections. The long-established domain and broad traffic footprint further support continuity and legitimacy.

- Domain registered on 2002-02-21 and approximately 24.46 years old.
- Homepage analysis identified no phishing forms, hidden forms, brand impersonation, or high-risk financial features.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist finding.

Regulatory Verification Notes

The site presents seller information, delivery, payment, returns, and customer-support material appropriate to an online retailer. No financial-services licensing claim is made or established in the supplied evidence; this is a limited disclosure point rather than evidence of deception. The site's technical and operational signals are consistent with an established service.

- Homepage provides seller, payment, delivery, returns, and support navigation.
- Hosted on AS200350 through YandexCloud - Yandex.Cloud LLC, RU.
- TLS certificate issued by YR1 using DV validation, valid to 2026-09-07.

What to Verify Next

For material commercial orders, confirm the seller details and applicable consumer-protection terms on the site's seller-information and returns pages. Where procurement policy requires formal legal-entity or licensing confirmation, validate the relevant details through the applicable official registry or an independently sourced contact channel.

- Seller-information and policy pages are exposed through the homepage navigation.
- Delivery, payment, returns, and support functions are explicitly presented as separate service areas.

Summary Verdict

The website presents a high-trust posture consistent with a legitimate, established ecommerce entity. Its identity, business model, technical operation, and external reputation converge without observed contradiction, supporting normal interaction and standard use.

Infrastructure Integrity

The site resolves to a single Yandex Cloud-hosted address in Russia under AS200350, without a detected CDN or WAF layer. This provides identifiable hosting context, while the valid TLS certificate offers a baseline transport-security control.

Closing Assessment

Normal browsing, account login, ordering, and standard transactions are appropriate, subject to ordinary controls for high-value purchases.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about my-shop.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
