

Is my.ecom.com.co legit? TrustSniffer's high-trust assessment: 98/100

my.ecom.com.co

Verdict

98

OUT OF 100

HIGH TRUST

my.ecom.com.co appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 70%.

What this site appears to be

Spanish-language corporate landing page for Ecom, a regional B2B SaaS company offering sales-force, delivery, merchandising, invoicing, inventory, and ecommerce solutions across Latin America. The page promotes product demonstrations and collects business contact information with explicit data-processing consent. No clear phishing, malware, cryptocurrency, or brand-impersonation indicators are present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the Spanish-language corporate portal of Ecom, an established regional B2B software provider offering cloud-based tools for sales-force automation, invoicing, inventory management, delivery logistics, merchandising, and ecommerce across Latin America, with commercial access arranged through demonstrations, implementation, customization, maintenance, and support services.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or malicious reputation findings were observed. The domain has a long-established registration history and sustained archival presence, while the landing page presents a coherent business purpose rather than an unrelated or recently repurposed service. Normal interaction, including account login and standard use, is appropriate.

- Domain-registration records show registration on 17 November 2005 (~20.72 years old), with Hello Internet Corp 8 as registrar and expiration on 16 November 2026.
- The web archive contains 76 snapshots spanning March 2020–March 2025 (6 years tracked); no suspicious repurposing or semantic drift was identified.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, no external threat listing, and no reported abuse.
- The Colombia landing page showed no login-form spoofing, hidden forms, cloaking, cryptocurrency functionality, or brand-impersonation characteristics.

Regulatory Verification Notes

The observed business model is enterprise SaaS rather than a financial, investment, or brokerage service, and the supplied evidence does not establish a need for sector-specific financial licensing. The captured landing page does not clearly identify a licensing or corporate-registration number, so regulated counterparties should distinguish ordinary vendor due diligence from financial-services authorization checks. Its claim of a “100% proven” return on investment is not substantiated by supporting methodology on the observed page and should be treated as a marketing assertion rather than independently demonstrated performance.

- The homepage describes the service as cloud software delivered under a SaaS model and directs prospective customers toward sales inquiries and product demonstrations.
- The observed site content contains no claimed license, named licensing authority, or license number.

- Hosting and transport telemetry show service from AS31898 (Oracle Corporation, US) and a DV TLS certificate issued by YR2, valid to 1 November 2026.
- The third-party broker-intelligence dataset produced no match for the business.

What to Verify Next

Enterprise onboarding should confirm the contracting legal entity, applicable jurisdiction, service-level commitments, data-processing terms, retention practices, and incident-notification obligations. Procurement teams should also obtain evidence supporting material performance claims and validate official commercial channels through independently sourced corporate records.

- The demo-request form collects business contact and personal information, presents data-processing consent, and was not observed submitting to an untrusted destination.
- The product page states that operational data is updated in real time through a web platform and that workforce activities can be recorded from Android mobile devices.

Summary Verdict

The site is a legitimate, established, and trustworthy B2B software presence. Its consistent commercial purpose, longstanding provenance, clean external reputation, coherent page content, and benign observed behavior provide strong, convergent support for normal business engagement.

Infrastructure Integrity

The site resolves directly to a single US-hosted address without a detected CDN or WAF edge layer and without separate origin candidates. This is a conventional, resolved hosting posture; transport encryption is valid, although infrastructure protection alone is not evidence of organizational legitimacy.

Closing Assessment

Prospective customers may proceed with normal use and account access, applying standard enterprise vendor-onboarding and contractual due-diligence controls before deployment.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of my.ecom.com.co.

- The request stayed on my.ecom.com.co. It was not redirected to another domain. CLEAR
- Registration is published under Hello Internet Corp 8. CLEAR
- DNS for this domain is served by bluehost.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-16. NOTED
- The earliest public archive of this site is from 2020-03-11. CLEAR
- It is hosted on ORACLE-BMC-31898, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about my.ecom.com.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
