

Is mybusiness361.com a scam? TrustSniffer's high-risk assessment: 0/100

mybusiness361.com

Verdict

0

OUT OF 100

CRITICAL RISK

mybusiness361.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Minimal login page for 'Mybusiness361' invoicing service. Contains urgency message about page expiry and standard account login/signup links but lacks company identifiers, contact, or product details.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://mybusiness361.com/public/login>

What mybusiness361.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website presents itself as “Mybusiness361.com,” a free, open-source online invoicing service where visitors can create, send, and receive payment for invoices through account login and signup functions. The available landing experience is limited to an access screen rather than a developed service presentation, leaving the operating purpose and business model insufficiently established.

Scam/Impersonation Risk

The site presents a **material sensitive-interaction risk**. External security assessments recorded 15 malicious detections and confirmed blacklist status, with the finding attributed to multiple independent security providers; this is a direct contradiction to treating the domain as suitable for credential or financial interaction. The page itself reinforces the concern by offering only a login and signup workflow, accompanied by the urgency message “This page will expire soon, click here to keep working,” without explaining the service, operator, or account context. No brand impersonation or conflicting legal-entity identity was observed, but the confirmed blacklist findings independently warrant a clearly cautionary posture.

EVIDENCE

- The homepage/login page returned a minimal invoicing access screen with “Account Login,” “Recover your password,” and “Create an Account!” functions.
- The homepage displayed the urgent session-expiry call to action: “This page will expire soon, click here to keep working.”
- External reputation checks recorded 15 malicious detections, zero suspicious detections, and confirmed blacklist status from two external sources.
- Domain registration evidence records creation on 2016-03-16 and an age of 10.44 years.

Regulatory Verification Notes

The available page does not identify a legal company, registered office, responsible operator, licensing authority, or license number. It also provides no substantive terms, privacy, billing, refund, or support disclosures from which the service’s accountability or regulatory position can be assessed. The site’s claimed invoicing function should therefore be treated as an unverified service claim rather than evidence of a regulated financial or payments operation. No matching third-party broker record was identified, but that contextual result is not a licensing or legal determination. The domain’s registration privacy is an administrative limitation and does not establish either legitimacy or misconduct.

EVIDENCE

- The homepage title identifies “Free Open-Source Online Invoicing,” but the captured page contains only 238 characters of visible text and no company identifiers.
- No license authority or license number is disclosed in the available business-model and page-content material.
- The site’s TLS certificate is DV-validated, issued by YE2, and valid to 2026-10-10T21:03:08+00:00.
- The domain is registered through LiquidNet Ltd. and expires on 2027-03-16T03:06:08Z.

What to Verify Next

Before any account, credential, payment, or invoicing interaction, an organization should independently identify the operator and confirm its registration and any applicable payments, accounting, or financial-services authorization through the relevant official registry. Contact and support channels should be confirmed through an independent, offline route rather than relying solely on the page. Any legitimate business relationship should also be conditioned on review of verifiable terms, privacy provisions, data-retention commitments, billing arrangements, and customer-protection procedures.

EVIDENCE

- The captured site provides one sensitive login form and no developed product or company context.
- Browser testing recorded two successful runs with no external network requests, no hidden forms, and no wallet-related activity; these observations do not validate the operator’s identity or safety.
- Page analysis classified the site as “Login-only / Unknown” and identified the specific red flag “LOGIN_PAGE_ONLY_NO_CONTEXT.”

Summary Verdict

The website has a **critical trust posture** and should not be treated as an established or verified service for sensitive interaction. The convergence of confirmed malicious reputation findings, a credential-entry surface with minimal context, and an unverified operator identity supports a high-confidence decision to withhold credentials, financial information, and business data pending independent validation.

Infrastructure Integrity

The site is delivered through Cloudflare's CDN and WAF, with all six observed addresses belonging to CDN edge infrastructure and no origin candidate identified during the assessment. The infrastructure provides meaningful exposure mitigation, but CDN protection is not evidence that the underlying service or operator is legitimate.

EVIDENCE

- The site is served from AS13335, Cloudflare, Inc., United States.
- Observed edge addresses included 104.21.19.98, 13.248.169.48, 172.67.185.188, and 2606:4700:3031::ac43:b9bc.
- The infrastructure record identifies Cloudflare CDN/WAF protection and 6 edge IPs, with 0 likely origin IPs.

Closing Assessment

Sensitive interaction should be suspended unless independent operator, authorization, and service-account validation produces satisfactory results; any decision to proceed should use tightly controlled, non-production information and approved organizational safeguards.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, page content, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The page presents a sign-in form, and the operator behind it could not be independently verified.
Page content rule:PAGE_TYPE_LOGIN_UNVERIFIED
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- A sign-in path on this site handles sensitive information.
Page content rule:PAGE_LOGIN_PATH_SENSITIVE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mybusiness361.com.

- The request stayed on mybusiness361.com. It was not redirected to another domain. CLEAR
- Registration is published under LiquidNet Ltd.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-16. NOTED
- The earliest public archive of this site is from 2018-08-08. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mybusiness361.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
