What myheartcode.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Governance Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2021.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

The website is a domain-marketplace listing for myheartcode.com, presenting the domain as available for purchase through Spaceship with buy-now, offer, down-payment, and lease-to-own options. Its apparent business model is to facilitate domain sales and related payment transactions rather than provide an operating service under the domain name itself.

Scam/Impersonation Risk

No blacklist, phishing, brand-impersonation, or conflicting legal-identity signals were observed. The page presents itself as a domain-for-sale listing and directs transaction activity to Spaceship, with no explicit scam indicators identified in the supplied content. An external IP-reputation record associates nine abuse reports with the shared hosting IP; because the attribution is to shared infrastructure, this is a soft reputational signal about the address rather than evidence of abuse by this website.

EVIDENCE

- The homepage identifies myheartcode.com as a domain for sale and labels the listing as being with Spaceship.
- The page-level analysis records no phishing, hidden-form, wallet-drainer, or brand-impersonation indicators.
- The domain-registration record lists creation on 2026-02-19 and an age of 0.5 years.
- Archive records contain 2 snapshots spanning 2021–2022, with 1 year tracked.

Regulatory Verification Notes

The supplied page is a commercial domain marketplace listing, not a page making a regulated financial-services claim. It does not display a license, registration number, or clearly identified independent operating entity, so the operator's real-world identity remains unverified and the applicable contractual and consumer-protection framework is unclear. The listing offers a buy-now price of \$1,888, a down payment of \$566.40, and lease-to-own payments of \$440.53 for three months; these payment mechanics warrant confirmation of the seller, transaction terms, transfer conditions, and available buyer protections before funds are committed. The external broker dataset contains no matching record, which is neutral context rather than a regulatory determination.

EVIDENCE

- The homepage displays the purchase, offer, down-payment, and lease-to-own transaction paths.
- WHOIS identifies Spaceship, Inc. as the registrar.
- The site is served from AS16509, Amazon.com, Inc., United States.
- The transport certificate is issued by YR2, uses Domain Validation (DV), and is valid through 2026-11-17.

What to Verify Next

Before a material transaction, independently confirm that the payment and negotiation flow resolves to the official Spaceship service, review the seller identity and domain-transfer terms presented at checkout, and confirm the scope of any buyer-protection programme. Where the transaction is subject to jurisdiction-specific marketplace or consumer rules, confirm the applicable legal entity and protections through an independent registry or offline business channel. Basic contact details should be submitted only after the marketplace destination and privacy terms have been independently validated.

EVIDENCE

- The offer form requests the prospective buyer's first name, last name, email address, and phone number.
- The page states that payment and negotiation continue through Spaceship.
- The listing advertises transaction support, secure payments, fast transfer, flexible payment methods, and a buyer-protection programme.

Summary Verdict

The website presents a coherent, low-complexity domain-sale use case with no observed scam or impersonation contradiction. Its overall posture is **moderate trust**: suitable for ordinary browsing and structured marketplace review, but not sufficiently established in identity and governance terms to support unqualified confidence in a high-value transaction.

Infrastructure Integrity

The site is protected by AWS CDN/WAF infrastructure, with observed edge addresses 44.232.173.249 and 52.40.42.113 on AS16509; no origin-server candidate was observed. This provides a meaningful exposure-mitigation layer, but protective hosting infrastructure alone does not establish the legitimacy of the seller or transaction.

Closing Assessment

Proceed with ordinary marketplace review, while completing independent seller, payment-destination, transfer-term, and buyer-protection checks before any high-value or sensitive action.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about myheartcode.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
