- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

MyJobMag Kenya is an online job board and recruitment marketplace presenting vacancies across Kenyan regions and industries, employer job-posting and recruitment services, career advice, job alerts, and related resources; its apparent model combines free access for jobseekers with employer-paid postings, recruitment services, featured listings, and advertising.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent employment marketplace with job searches, employer services, career content, and login or signup functions, while the content review found no phishing, impersonation, malicious-site, or other fraud indicators. Reputation checks were clean, and the domain shows sustained historical continuity rather than evidence of suspicious repurposing. Some interaction-driven page changes and external network activity were observed during technical testing, but these did not correspond to hidden forms, credential exfiltration, cloaking, wallet activity, or other abuse patterns. The site therefore appears legitimate and established, although the real-world operator identity remains independently unverified.

EVIDENCE

- The homepage contains job listings, location and industry navigation, employer posting options, career advice, job alerts, and login or signup functions.
- Historical coverage records 225 archive snapshots from 2016-09-08 through 2026-06-01, spanning 11 tracked years.
- Domain registration records show creation on 2016-08-09 and an age of 10.01 years.
- External reputation checks recorded zero malicious and zero suspicious detections, with no phishing or impersonation finding.

Regulatory Verification Notes

The available content supports an established employment-marketplace purpose but does not independently establish the legal identity of the operator. No professional or recruitment license claim, licensing authority, or license number is provided in the analyzed content; this is a verification and disclosure gap rather than evidence of deception. Standard consent and advertising disclosures are present. The domain is registered through HOSTAFRICA EAC, while the transport certificate provides domain-level encryption but does not authenticate the operating entity.

EVIDENCE

- The homepage content identifies employer posting and recruitment services but contains no stated license authority or license number.
- The domain registrar is HOSTAFRICA EAC; registration expires on 2027-08-09.
- The site uses a valid DV TLS certificate issued by WE1, valid to 2026-09-22.
- The analyzed page includes standard consent and advertising-vendor disclosures.

What to Verify Next

Before credential or payment interactions, an institution should independently confirm the operating company behind the service and, where relevant, confirm any recruitment-related authorization with the applicable Kenyan registry. Jobseekers should validate the identity of individual employers through independent corporate or institutional channels and confirm that any requested documents, fees, or communications are consistent with the advertised role. Account users should review the site's privacy, account-recovery, and payment-protection terms, while employer customers should confirm invoicing, cancellation, and service-delivery conditions through independently verified official channels.

EVIDENCE

- The homepage exposes separate employer and candidate workflows, including "Post A Job / Recruit," login, signup, and job-alert subscription functions.
- The page review found no sensitive form beyond ordinary login and signup functionality and no untrusted form destination.
- The analyzed content identifies career resources and advertising or consent notices but does not provide an independently verified operator identity.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture. No contradictory fraud or impersonation signals were identified, but the operator's real-world identity is not independently verified, so legitimacy should be understood as evidence-consistent rather than proven.

Infrastructure Integrity

The site is delivered through Cloudflare's CDN/WAF infrastructure, with observed traffic terminating at Cloudflare edge addresses and no origin candidate identified in the analysis. This provides a meaningful protective layer against direct origin exposure, but it is a mitigating security control and not proof of operator legitimacy.

EVIDENCE

- Hosting is recorded on AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- Observed edge addresses include 104.26.4.148, 104.26.5.148, 172.67.72.218, and 2606:4700:20::681a:494, all associated with AS13335.
- The site's TLS certificate is DV, issued by WE1, and valid through 2026-09-22.

Closing Assessment

Normal browsing and ordinary account use are proportionate to the evidence, while independent identity, employer, payment, and document-handling checks should be completed before sensitive credentials, money, or personal records are submitted.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of myjobmag.co.ke.

- The request stayed on myjobmag.co.ke. It was not redirected to another domain. CLEAR
- Registration is published under HOSTAFRICA EAC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-08-09. NOTED
- The earliest public archive of this site is from 2016-09-08. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about myjobmag.co.ke at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
