

Is myofficedash.com a scam? TrustSniffer's high-risk assessment: 0/100

myofficedash.com

Verdict

0

OUT OF 100

CRITICAL RISK

myofficedash.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Very short page with text: "Test, Test". No links, forms, or identifiable business model present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	13 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	8.4 years old Registered history	CLEAR
Web archive	Archived since 2021 Public history exists	CLEAR
Certificate	Encrypted connection Issued by WE1	NOTED

Test, Test

What myofficedash.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

myofficedash.com presents an extremely minimal webpage containing only the text “Test, Test,” with no identifiable service, product, operator, or apparent business model. Its purpose cannot be established from the observed content, and the page does not provide a meaningful basis for treating it as an operational business website.

Scam/Impersonation Risk

The site carries a confirmed **blacklist** signal from multiple external reputation channels, including malicious detections by security vendors. This is a material contradiction that outweighs the absence of visible phishing forms, scripts, or active interaction mechanisms on the captured page. The evidence does not establish a specific impersonated brand or payload, but it does support treating the domain as unsuitable for sensitive interaction. The domain’s age does not neutralize the current reputation risk.

EVIDENCE

- External reputation assessment recorded 13 malicious detections, with Kaspersky and Sophos among the flagged vendors.
- The domain is recorded as blacklisted by both VT and an external blacklist source.
- Domain registration: 2018-04-12; age 8.36 years; registrar NameSilo, LLC.

Regulatory Verification Notes

Independent identity verification is incomplete, and the observed homepage supplies no identifiable legal entity, service description, licensing claim, or registration number. Because the page contains only “Test, Test,” the regulatory status of any intended activity cannot be assessed from the website itself. A valid transport certificate confirms encrypted communication, but it does not establish operator identity, authorization, or regulatory standing.

EVIDENCE

- The homepage contains approximately 10 characters of visible text and no identifiable business model, internal links, forms, or business disclosures.
- The site’s TLS certificate is issued by WE1, uses DV validation, and is valid to 2026-10-10.
- Hosting infrastructure identifies Cloudflare, Inc. as the provider and NameSilo, LLC as the registrar.

What to Verify Next

Before any engagement, an independent source should identify the intended operator and confirm whether any proposed service falls within a regulated activity. Any claimed license should be checked directly against the relevant regulator’s registry using independently obtained contact details, and official contact channels should be confirmed through an offline or separately trusted route. Login, credential submission, payment, wallet, or other financial interaction should not proceed unless those checks produce independently corroborated results.

EVIDENCE

- The homepage provides no service description against which a licensing requirement can be determined.
- No operator identity or regulatory claim is presented in the observed page content.
- The available assessment records the site’s identity verification status as unverified.

Summary Verdict

The overall posture is critical and materially unsuitable for sensitive interaction. The available evidence does not support confidence in the site’s legitimacy, identity, or operational purpose.

Infrastructure Integrity

The website is protected by Cloudflare’s CDN/WAF, and all observed addresses are CDN edge infrastructure rather than a directly exposed origin. This reduces direct origin exposure but is only a mitigating technical control and does not offset the external reputation findings.

EVIDENCE

- Served from AS13335 (Cloudflare, Inc.; United States).
- Four observed edge IP addresses were associated with AS13335; zero likely origin addresses were identified.
- TLS certificate issuer: WE1; validation level: DV; valid to 2026-10-10.

Closing Assessment

The appropriate enterprise posture is to avoid sensitive interaction and escalate any proposed business engagement for independent identity, regulatory, and security review before proceeding.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of myofficedash.com.

- The request stayed on myofficedash.com. It was not redirected to another domain. CLEAR
- Registration is published under NameSilo, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-04-12. NOTED
- The earliest public archive of this site is from 2021-12-10. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about myofficedash.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
