

Is myradioenvivo.ar legit? TrustSniffer's high-trust assessment: 95/100

myradioenvivo.ar

Verdict

95

OUT OF 100

HIGH TRUST

myradioenvivo.ar appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 70%.

What this site appears to be

MyRadioEnVivo is an Argentine-focused online radio directory aggregating 100+ stations with streaming links, program schedules, news snippets and links to mobile apps. The site uses a consent manager and appears ad-supported; no financial or credential-harvesting flows detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

- Public web-archive history exists since 2022.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

MyRadioEnVivo is an Argentine-focused online radio directory that presents visitors with more than 100 stations, live streaming links, programme schedules, song listings, radio news, podcast availability and links to mobile applications; its apparent business model is advertising- and affiliate-supported access to radio content, with optional account, contact and app-install functions.

Scam/Impersonation Risk

No contradictions were observed: the reviewed material shows no brand impersonation, phishing, confirmed blacklist or malicious-reputation finding. The site's functionality is consistent with an informational media directory rather than a credential- or payment-harvesting service. Runtime observations included two suspicious inline scripts, non-whitelisted external requests and post activity, but these occurred alongside advertising, analytics and consent-management functions; no hidden forms, externally submitted password forms, wallet activity, clipboard manipulation or cloaking were detected. These signals therefore represent limited technical noise rather than evidence of an impersonation scheme. The available evidence is consistent with an established, apparently legitimate website, although the real-world operator identity is not independently verified.

EVIDENCE

- The homepage describes a directory of more than 100 Argentine radio stations with streaming, programming, song and podcast features.
- External reputation checks recorded zero malicious and zero suspicious detections, no Google Safe Browsing malicious result, no external blacklist hit and zero abuse reports; the domain was ranked 79,346 and was within the top one million.
- Domain registration evidence records creation on 2014-04-25, making the domain 12.3 years old.
- Archive evidence records 119 snapshots spanning 2022–2026, covering 5 tracked years, with continuous historical activity; this is archival coverage rather than the full age of the domain.

Regulatory Verification Notes

The website presents an informational broadcasting directory and does not claim a financial, investment or other regulated service. No financial licence or licence number is claimed in the reviewed content, so regulatory verification is not central to the stated business model but remains a transparency item if the operator or any affiliated service is presented as regulated elsewhere. The reviewed material includes a contact function, a Facebook presence and links to named mobile-app marketplaces, but it does not independently verify the legal

identity of the operator. A separate broker-reputation dataset returned no match; this is contextual support only and is not a licensing determination. Technical establishment signals converge positively: the domain is long-established, registration is through nicar with EURODNS SA recorded as owner, and transport encryption uses a known certificate issuer.

EVIDENCE

- The website's hosting infrastructure is identified as AS13335, Cloudflare, Inc., US.
- The site's TLS certificate is issued by WE1 at DV validation level and is valid to 2026-10-05.
- The registration record lists registrar nicar, owner EURODNS SA, creation date 2014-04-25 and expiration date 2027-06-09.
- The contact, account, programming and station-submission functions are presented as ordinary directory features; no financial licence disclosure appears in the reviewed business description.

What to Verify Next

Before credential or payment interactions, an organisation should independently confirm the operator's legal identity, the official contact channels and the ownership or authorization of any linked mobile applications. If any future page introduces a regulated service, commercial subscription or monetized transaction beyond the directory model, its licensing and consumer-protection status should be checked with the relevant jurisdictional registry. App installations should remain limited to the publisher listings reached through the site and should be reviewed for publisher-name consistency and requested permissions.

EVIDENCE

- The site exposes a contact function and an account-login route, while the observed form analysis found no sensitive form.
- The site links to Google Play, Apple's App Store and a Facebook profile associated with the service.
- The reviewed page identifies advertising, analytics and consent-management activity, which should be reflected in the site's privacy and consent disclosures.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk informational website. Its content, technical history, external reputation and observed user flows support a high-trust posture, while the operator's real-world identity remains likely rather than independently verified.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, with observed traffic served through Cloudflare edge addresses and no origin candidate identified in this analysis. This is a meaningful exposure-mitigation measure, but it supports infrastructure integrity rather than proving the operator's legitimacy.

Closing Assessment

Normal browsing and listening are proportionate uses; credential or payment interactions should follow ordinary independent checks of merchant identity, applicable consumer terms, return or cancellation provisions, and payment protection.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of myradioenvivo.ar.

- The request stayed on myradioenvivo.ar. It was not redirected to another domain. CLEAR
- Registration is published under nicar. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-09. NOTED
- The earliest public archive of this site is from 2022-10-05. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about myradioenvivo.ar at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
