

Is mytotalika.org legit? TrustSniffer's high-trust assessment: 80/100

mytotalika.org

Verdict

80

OUT OF 100

HIGH TRUST

mytotalika.org appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 40%.

What this site appears to be

Marketing/home page for Totalika — a Delhi NCR event and recreational facility describing activities, sports facilities, catering and event planning with calls to contact for bookings.

Evidence status and limitations

Evidence completeness:

UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Totalika is a Delhi NCR events and recreational venue website presenting team outings, corporate gatherings, sports facilities, catering, and event-planning services, with bookings and contact enquiries as its apparent business model.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent local-venue proposition centred on cricket, swimming, basketball, badminton, catering, wellness, and event bookings, rather than financial solicitation or credential harvesting. The available page content contains no identified phishing, impersonation, or malicious-use indicators; testing also found no login form, sensitive form, wallet connection, hidden form, or suspicious external activity. The overall evidence is therefore consistent with an established, apparently legitimate venue website, while the real-world operator remains independently unverified.

EVIDENCE

- The homepage identifies Totalika as a Delhi NCR venue for team outings, corporate events, sports activities, catering, and bookings.
- The homepage content describes cricket, swimming, basketball, badminton, food and drinks, and use of approximately four acres of greenery.
- Domain registration continuity: registered 2015-11-08, approximately 10.79 years old.
- Web-archive records: 190 snapshots spanning 2017–2026, covering 10 years tracked.

Regulatory Verification Notes

The site's apparent activity is ordinary venue and event commerce rather than a regulated financial service. The available visitor-facing content does not independently establish the legal operating entity, and no license or registration number is claimed in the supplied material; this is a transparency item for ordinary commercial verification, not evidence of a scam. A separate broker-reputation comparison produced no match, which is contextual support only and not a licensing determination. Minor presentation gaps are also present because the homepage lacks a meta description and structured data, but these do not contradict the venue model.

EVIDENCE

- The homepage and navigation identify the business as an events-and-recreation venue with About, Services, Activities, Gallery, Plan an Event, and Contact areas.
- The site's registration record lists IONOS SE as registrar.
- Hosting is identified as AS46475, Limestone Networks, Inc., United States.
- Transport encryption uses a DV certificate issued by YR1, valid through 2026-11-03.

What to Verify Next

Before any credential or payment interaction, the prospective customer should independently confirm the operating entity behind the venue, review booking, cancellation, refund, and event-liability terms, and confirm that payment protections are available through the selected payment method. Contact details should be validated through an independent channel, and any permits or local requirements relevant to the particular event or facility use should be confirmed where applicable.

EVIDENCE

- The homepage uses contact and booking calls to action rather than an online account or payment form.
- The supplied page analysis found no sensitive form and no untrusted form destination.
- The site describes multiple facilities and ancillary catering services, making the specific booking terms and inclusions material to any transaction.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. The conclusion concerns the observed website and its operational signals; it does not independently prove the real-world identity of the operator.

Infrastructure Integrity

The supplied infrastructure record supports basic service continuity and encrypted transport, but it does not independently authenticate the venue operator. No separate CDN, WAF, or origin-masking conclusion is established in the available infrastructure evidence, so hosting protections should be treated as technical mitigation rather than proof of legitimacy.

Closing Assessment

Ordinary use is proportionate to the observed risk posture, with independent merchant-identity, booking-term, and payment-protection checks completed before credentials or payment details are submitted.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mytotalika.org.

- The request stayed on mytotalika.org. It was not redirected to another domain. CLEAR
- Registration is published under IONOS SE. CLEAR
- DNS for this domain is served by webhostuk.org, across 2 name servers. NOTED
- The registration is paid up to 2026-11-08. NOTED
- The earliest public archive of this site is from 2017-06-22. CLEAR
- It is hosted on LIMESTONENETWORKS, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mytotalika.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
